Element	Section D – Risks	
D.2	Key information on the key risks that are specific to the issuer	<p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> • Even as the U.S. economy has gradually improved, Europe continues to experience tepid economic growth, high levels of structural debt, persistent long-term unemployment and very low inflation. These persistently challenging market conditions have contributed to political uncertainty in many member countries of the eurozone and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of Deutsche Bank's businesses, while a continuing low interest environment and competition in the financial services industry have compressed margins in many Deutsche Bank's businesses. If these conditions persist or worsen, Deutsche Bank could determine that it needs to make changes to its business model. • Regulatory and political actions by European governments in response to the European sovereign debt crisis may not be sufficient to prevent the crisis from spreading or to prevent departure of one or more member countries from the common currency. In particular, anti-austerity populism in Greece and other member countries of the eurozone could undermine confidence in the continued viability of those countries' participation in the euro. The default or departure from the euro of any one or more countries could have unpredictable political consequences as well as consequences for the financial system and the greater economy, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited. • Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries as the European sovereign debt crisis continues. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses. • Deutsche Bank has a continuous demand for liquidity to fund its business activities. It may suffer during periods of market-wide or firm-specific liquidity constraints, and liquidity may not be available to it even if its underlying business remains strong. • Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. • Regulatory and legislative changes require Deutsche Bank to maintain increased capital and may significantly affect its business model and the competitive environment. Any perceptions in the market that Deutsche Bank may be unable to meet its capital requirements with an adequate buffer, or that it should maintain capital in excess of the requirements, could intensify the effect of these factors on Deutsche Bank's business and results. • The increasingly stringent regulatory environment to which Deutsche Bank is subject, coupled with substantial outflows in connection with litigation and enforcement matters, may make it difficult for Deutsche Bank to maintain its capital ratios at levels above those required by regulators or expected in the market. • Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model. • European and German legislation regarding the recovery and resolution of banks and investment firms as well as proposals published by the Financial Stability Board proposing a new minimum capital requirement for "total loss absorbing capacity" (TLAC) could result in higher refinancing costs and, if resolution measures were imposed on

		<p>Deutsche Bank, significantly affect its business operations and lead to losses for its creditors.</p> <ul style="list-style-type: none"> • Other regulatory reforms adopted or proposed in the wake of the financial crisis - for example, extensive new regulations governing Deutsche Bank's derivatives activities, bank levies or a possible financial transaction tax - may materially increase Deutsche Bank's operating costs and negatively impact its business model. • Adverse market conditions, historically low prices, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities. • Since Deutsche Bank published its Strategy 2015+ targets in 2012, macroeconomic and market conditions as well as the regulatory environment have been much more challenging than originally anticipated, and as a result, Deutsche Bank has updated its aspirations to reflect these challenging conditions and developed the next phase of its strategy in the form of its Strategy 2020, which was announced in April 2015 and updated and further specified on 29 October 2015. If Deutsche Bank is unable to implement its updated strategy successfully, it may be unable to achieve its financial objectives, or incur losses or low profitability or erosions of its capital base, and its share price may be materially and adversely affected. • Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing it to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm. • Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation. • Deutsche Bank's non-traditional credit businesses materially add to its traditional banking credit risks. • Deutsche Bank has incurred losses, and may incur further losses, as a result of changes in the fair value of its financial instruments. • Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses. • Operational risks may disrupt Deutsche Bank's businesses. • Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses. • The size of Deutsche Bank's clearing operations exposes it to a heightened risk of material losses should these operations fail to function properly. • Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price. • Deutsche Bank may have difficulties selling non-core assets at favorable prices or at all and may experience material losses from these assets and other investments irrespective of market developments. • Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability. • Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in its securities, harm its reputation or result in regulatory action which could materially and adversely affect its business.
D.6	<p>Risk warning to the effect that investors may lose the value of their entire investment or part of it</p>	<p>Securities are linked to the Underlying</p> <p>Amounts payable or assets deliverable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Items. The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the terms and conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in accordance with</p>

	<p>which the amounts payable and/or assets deliverable are calculated, and if necessary seek advice from their own adviser(s).</p> <p>Risks associated with the Underlying</p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the index.</p> <p>Currency risk</p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p>Early Termination</p> <p>The terms and conditions of the Securities include a provision pursuant to which, either at the option of the Issuer or otherwise where certain conditions are satisfied, the Issuer is entitled to redeem or cancel the Securities early. Upon such early redemption or cancellation, depending on the event which resulted in such early redemption or cancellation, the Issuer will pay either a specified minimum amount in respect of each nominal amount, plus, in certain circumstances, an additional coupon, or, in limited circumstances, only the market value of the Securities less the direct and indirect costs to the issuer of unwinding or adjusting any underlying related hedging arrangements, which may be zero. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption or cancellation. During any period where the Securities may be redeemed or cancelled in this way the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the terms and conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g., "knock-out" or "auto call" provision).</p> <p>Regulatory bail-in and other resolution measures</p> <p>If the competent supervisory authority or the competent resolution authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers are hereinafter referred to as the "Bail-in tool"), or to apply any other resolution measure including (but not limited to) a transfer of the Securities to another entity, an amendment of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p>Risks at maturity</p> <p>If the Issuer calls the Single Underlying Callable Note, an investor will no longer be able to realise his expectations for a gain in the value of the Single Underlying Callable Note and will no longer participate in the performance of the Underlying. Also, in the event that prevailing interest rates on similar instruments at the time of the Issuer call have declined relative to the implied interest rate on the Single Underlying Callable Note as of the time of initial issuance, an investor may be unable to invest the call proceeds in securities with a comparable risk-return profile as the Single Underlying Callable Note.</p>
