1. What is this product?

Type English law governed notes

Objectives

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of (1) conditional interest payments and (2) a cash payment on the **maturity date**.

Interest: On each **interest payment date** you will receive a cash payment directly linked to the performance of the **underlying**. The cash payment will equal (i) the relevant **participation rate** set forth below multiplied by the **product notional amount** multiplied by (ii) (x) (A) the **reference price** on the immediately preceding **interest observation date** divided by (B) EUR 146.83 minus (y) 100.00%. However, if this cash payment exceeds EUR 60.00, you will only receive EUR 60.00 and if it is less than EUR 0.00, you will receive EUR 0.00. The relevant dates and other details are shown in the table(s) below.

Interest observation dates	Interest payment dates	Participation rate
20 January 2017	27 January 2017	100.00%
22 January 2018	29 January 2018	50.00%
22 January 2019	29 January 2019	33.333333%
22 January 2020	29 January 2020	25.00%
22 January 2021	29 January 2021	20.00%
21 January 2022	28 January 2022	16.66667%
20 January 2023	27 January 2023	14.28571%
22 January 2024	29 January 2024	12.50%
22 January 2025	Maturity date	11.11111%

Termination on the maturity date: On termination of the product on the **maturity date** you will receive EUR 1,000.00.

Under the product terms, certain dates specified above and below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

When purchasing this product during its lifetime, the purchase price does not include accrued interest on a pro rata basis.

However, you will also be required to pay accrued interest on a pro rata basis if you purchase the product during its lifetime.

You do not have any entitlement to a distribution from the **underlying** and you have no right to any further entitlement resulting from the **underlying** (e.g., voting rights).

Underlying	Shares of the DNCA Invest Eurose (ISIN: LU0284394235)	Issue date	29 January 2016
Underlying market	Equity	Initial reference price	EUR 146.83
Product notional amount	EUR 1,000	Reference price	The closing price of the underlying as per the reference source
Product currency	Euro (EUR)	Reference source	Luxembourg Stock Exchange (Main Segment)
Underlying currency	Euro (EUR)	Maturity date / term	29 January 2025

The issuer may terminate the product with immediate effect in the event of obvious written or mathematical errors in the terms and conditions or if certain extraordinary events provided in the terms and conditions occur. Examples of extraordinary events include (1) material changes, particularly in connection with the **underlying**, and (2) events, in particular due to changes in certain external conditions that hinder the issuer in meeting its obligations in connection with the product or – depending on the terms and conditions of the security – otherwise affect the product and/or the issuer. In case of immediate termination, the return (if any) may be significantly lower than the purchase price, but will reflect the product's market value and, if higher, any minimum redemption (alternatively, in some cases the corresponding compounded amount may be paid out at the product's scheduled maturity). Instead of immediate termination, the issuer may also amend the terms and conditions.

Provided that in the event of any inconsistency and/or conflict between the foregoing paragraph and any applicable law, order, rule or other legal requirement of any governmental or regulatory authority in a territory in which this product is offered, such national requirements shall prevail.

Intended retail investor

The product is intended for private clients who pursue the objective of general capital formation/asset optimization and have a medium-term investment horizon. This product is a product for clients who have sufficient knowledge and / or experience to make an informed investment decision. The investor cannot bear any losses on the capital invested and attaches importance to capital protection.

2. What are the risks and what could I get in return?

Risk indicator

← Lower risk Higher risk →

The risk indicator assumes you keep the product for 3 years and 3 months. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

You are entitled to receive back at least 100.00% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before maturity or in case of immediate termination by the issuer.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment: EUR 10,000

Scenarios		1 year	2 years	3 years and 3 months (Recommended holding period)
Stress scenario	What you might get back after costs	EUR 9,239.69	EUR 9,527.43	EUR 9,727.35
	Average return each year	-7.60%	-2.39%	-0.83%
Unfavourable scenario	What you might get back after costs	EUR 9,673.45	EUR 9,694.30	EUR 9,833.19
	Average return each year	-3.27%	-1.54%	-0.51%
Moderate scenario	What you might get back after costs	EUR 9,970.30	EUR 10,028.42	EUR 10,205.89
	Average return each year	-0.30%	0.14%	0.62%
Favourable scenario	What you might get back after costs	EUR 10,305.72	EUR 10,426.53	EUR 10,659.88
	Average return each year	3.06%	2.11%	1.96%

This table shows the money you could get back over the next 3 years and 3 months under different scenarios, assuming that you invest EUR 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Deutsche Bank AG, London Branch is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see www.bafin.de and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest EUR 10,000. The figures are estimates and may change in the future.

Costs over time

<i>Investment: EUR 10,000</i>			
<i>Scenarios</i>	<i>If you cash in after 1 year</i>	<i>If you cash in after 2 years</i>	<i>If you cash in at the end of the recommended holding period</i>
Total costs	EUR 95.92	EUR 95.92	EUR 0.00
Impact on return (RIY) per year	0.95923%	0.4778%	0.00%

The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming the product performs in line with the moderate performance scenario.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

The table shows the impact on return per year.

One-off costs	<i>Entry costs</i>	0.00%	The impact of the costs already included in the price.
	<i>Exit costs</i>	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	<i>Portfolio transaction costs per year</i>	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	<i>Other ongoing costs</i>	0.00%	The impact of the costs that we take each year for managing your investments.

5. How long should I hold it and can I take money out early?

Recommended holding period: 3 years and 3 months

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 29 January 2025 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product off-exchange. No fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Not applicable	Price quotation	Percentage
Smallest tradable unit	EUR 1,000		

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at:
