What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

Macroeconomic, Geopolitical and Market Environment: Deutsche Bank is materially affected by global macroeconomic and market conditions. Significant challenges may arise from persistent inflation, higher interest rates for longer, potential for widespread trade tariffs, market volatility, and a deteriorating macroeconomic environment. These risks could negatively affect the business environment, leading to weaker economic activity and a broader correction in the financial markets. Materialization of these risks could negatively affect Deutsche Bank's results of operations and financial condition as well as Deutsche Bank's ability to meet its financial targets. Deutsche Bank takes steps to manage these risks through its risk management and hedging activities but remains exposed to these macroeconomic and market risks.

Strategy and Business: If Deutsche Bank is unable to meet its financial targets or incur future losses or low profitability, Deutsche Bank's financial condition, results of operations and share price may be materially and adversely affected, and Deutsche Bank may be unable to make contemplated distributions or carry out share buybacks.

Regulation and Supervision: Prudential reforms and heightened regulatory scrutiny affecting the financial sector continue to have a significant impact on Deutsche Bank, which may adversely affect its business and, in cases of non-compliance, could lead to regulatory sanctions against Deutsche Bank, including prohibitions against Deutsche Bank making dividend payments, share repurchases or payments on its regulatory capital instruments, or increasing capital and liquidity requirements.

Internal Control Environment: A robust and effective internal control environment and adequate infrastructure (comprising people, policies and procedures, controls testing and IT systems) are necessary to enable Deutsche Bank to conduct its business in compliance with the laws, regulations and associated supervisory expectations applicable to Deutsche Bank. Deutsche Bank has identified the need to strengthen its internal control environment and infrastructure and has been required to do so in certain areas by its regulators. Deutsche Bank has undertaken initiatives to accomplish this. If these initiatives are not successful or proceed too slowly, Deutsche Bank's reputation, regulatory position and financial condition may be materially adversely affected, and its ability to achieve Deutsche Bank's strategic ambitions may be impaired.

Technology, Data and Innovation: Digital innovation may offer market entry opportunities for new competitors such as cross-industry entrants, global tech companies and financial technology companies. Therefore, Deutsche Bank expects its businesses to have an increased need for investments in digital products and process recourses to remain competitive and protect Deutsche Bank from security threats. If the above investments are not made, there is a risk that Deutsche Bank could lose market share, which could have a material adverse effect on its financial results.

Litigation, Regulatory Enforcement Matters, Investigations and Tax Examinations: Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing Deutsche Bank to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm.

Climate Change and Environmental, Social and Governance (ESG)-Related Matters: The impacts of rising global temperatures and the associated policy, technology and behavioural changes required to limit global warming to no greater than 1.5°C above pre-industrial levels have led to emerging sources of financial and non-financial risks. These include the physical risk impacts from extreme weather events and transition risks as carbon-intensive sectors are faced with higher costs, potentially reduced demand and restricted access to financing. More rapid than currently expected emergence of transition and/or physical climate risks and other environmental risks may lead to increased credit and market losses as well as operational disruptions due to impacts on vendors and Deutsche Bank's own operations.

Other Risks: Deutsche Bank's risk management policies, procedures and methods leave Deutsche Bank exposed to unidentified or unanticipated risks, which could lead to material losses.

Early Redemption

Early redemption following the occurrence of a Credit Event

If a Credit Event has occurred with respect to the Reference Entity during the Credit Exposure Period, a holder of the Securities will receive on the Credit Event Redemption Date an amount in the Specified Currency equal to the product of (i) the Nominal Amount and (ii) the Settlement Price (as described in more detail below). This amount is likely to be less than the Nominal Amount (and in some cases may be zero) and, therefore, a Securityholder is likely to suffer a loss of a substantial portion, and possibly all, of their investment in such circumstances.

Settlement Price: The “Settlement Price” is determined based on the price of certain obligations of the Reference Entity of the relevant seniority following the occurrence of the relevant Credit Event. The Settlement Price will be determined, either:

- (i) through a standardised auction process, organised by a CDDC. The auction will involve a bidding process by institutions participating in the relevant auction pursuant to a bidding procedure set by ISDA, to establish the value of certain eligible obligations of the Reference Entity which may include bonds, loans and guarantees. The outcome of any auction is likely to reflect the prevailing price of the cheapest relevant obligation(s) of the Reference Entity, or
- (ii) where a relevant auction does not happen, by the Calculation Agent manually seeking quotes from market dealers to determine a “final price” for the relevant obligation(s).

As such, the amount a Securityholder shall receive upon early redemption of the Securities following the occurrence of a Credit Event takes into account the percentage reduction in the price of the Reference Entity’s obligations of the relevant seniority following the occurrence of the relevant Credit Event.

Early redemption following the occurrence of an Event of Default

The occurrence of any of the following events with respect to the Issuer shall constitute an “Event of Default”: (i) the Issuer fails to pay principal or interest within in respect of the Securities 30 calendar days of the relevant due date; (ii) the Issuer fails duly to perform any other obligation arising from the Securities, if such failure continues for more than 60 days after the Issuer has received notice thereof from a Securityholder; (iii) the Issuer announces its inability to meet its financial obligations or ceases its payments; or (iv) a court in Germany opens insolvency proceedings against the Issuer.

A Security may be redeemed early by the relevant Securityholder following an Event of Default. In such circumstances, the amount payable to Securityholders will be an amount (which may never be less than zero) calculated by the Calculation Agent, in good faith and a commercially reasonable manner, equal to the fair market value of the Securities held by the relevant Securityholder, together with interest accrued to (but excluding) the day the relevant Event of Default occurred. For the purposes of determining the fair market value, no account shall be taken of the financial condition of the Issuer, which shall be presumed to be able to perform fully its obligations in respect of the Securities.

Early redemption for illegality or force majeure

If the Issuer determines that, for reasons beyond its control:

- (i) an event or circumstance (other than any action taken by the Issuer) occurs after the Issue Date of the Securities as a result of which it becomes unlawful under any applicable law (including without limitation the laws of any country in which payment, delivery or compliance is required by the Issuer), on any day, or it would be unlawful if the relevant payment, delivery or compliance were required on that day, for the Issuer to (a) make or receive payments or deliveries, (b) perform any absolute or contingent obligation to make a payment or delivery, (c) receive a payment or delivery or (d) comply with any other material provision; or

- (ii) a force majeure or act of state occurs after the Issue Date of the Securities, and the Issuer cannot, using all reasonable efforts (which will not require the Issuer to incur a loss, other than immaterial, incidental expenses), overcome such prevention, impossibility or impracticability in respect of the Securities and either (a) the Issuer is prevented from performing any absolute or contingent obligation to make a payment or delivery, from receiving a payment or delivery, or from complying with any other material provision (or would be so prevented if such payment, delivery or compliance were required on that day) or (b) it becomes impossible or impracticable for the Issuer to perform any absolute or contingent obligation to make a payment or delivery, to receive a payment or delivery, or to comply with any other material provision,

the Issuer may, at its discretion and without obligation, terminate the Securities early. If the Issuer redeems the Securities early, the Issuer will pay the holder of each such Security an amount determined by the Calculation Agent, acting in good faith and a commercially reasonable manner, to be its fair market value notwithstanding the illegality or impracticability, together with any coupon amount accrued.

Early redemption for a Merger Event

The Securities may be redeemed early if the Issuer consolidates, amalgamates with, or merges into, or transfers all or substantially all of its assets to, the Reference Entity or vice versa, or the Issuer and the Reference Entity become affiliates. In such circumstances, each Security may be redeemed by the Issuer at an amount equal to the Nominal Amount, together with any coupon amount accrued.

Issuer right to redeem Securities

The Issuer has an early redemption option and therefore has the right, on giving not less than a specified period of notice to Securityholders, as applicable, to redeem all outstanding Securities on any Issuer Early Redemption Date at a Redemption Amount equal to the product of the Applicable Call Percentage, determined by reference to the Issuer Early Redemption Date and the Nominal Amount (as applicable), as provided in the Product Conditions. The early redemption of the Securities in such circumstances may result in the Securityholders receiving less than their expected return if the Securities had been redeemed as their scheduled redemption.

Taxation

All payments or, as the case may be, deliveries in respect of the Securities will be subject in all cases to all applicable fiscal and other laws and regulations (including, where applicable, laws requiring the deduction or withholding for, or on account of, any tax, duty or other charge whatsoever). The Issuer shall have the right, but shall not be obliged, to withhold or deduct from any amount payable or, as the case may be, any delivery due to the Securityholder, such amount or portion as shall be necessary to account for or to pay any such tax, duty, charge, withholding or other amount.

Governing Law:

The Securities will be governed by English law.
