## 1. What is this product?

Type	German law governed equity-linked certificates / Return depends on the performance of the underlying / No capital protection against market risk
Term	The product has a fixed term and will be due on 27 November 2028.
Objectives	The product is designed to provide a return in the form of a cash payment on the <b>maturity date</b> . The amount of this payment will depend on the performance of the <b>underlying</b> . On termination of the product on the <b>maturity date</b> you will receive a cash payment directly linked to the performance of the <b>underlying</b> . The cash payment will equal (i) EUR 100 multiplied by (ii) (A) the <b>final reference level</b> divided by (B) the <b>initial reference level</b> .
(Terms that appear in <b>bold</b> in this section are described in more detail in the table(s) below.)	Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive. You do not have any entitlement to a dividend from the <b>underlying</b> and you have no right to any further entitlement resulting from the <b>underlying</b> (e.g., voting rights).

Underlying	EURO STOXX 50 (Price return index) (ISIN: EU0009658145)	Reference level	The closing level of the <b>underlying</b> as per the <b>reference source</b>
Underlying market	Equity	Reference source	STOXX Limited, Zurich
Product currency	Euro (EUR)	Final reference level	The <b>reference level</b> on the <b>final valuation date</b>
Underlying currency	Euro (EUR)	Initial valuation dates	2 September 2025, 30 September 2025, 31 October 2025, 28 November 2025, 29 December 2025, 30 January 2026 and 27 February 2026
Issue date	2 September 2025	Final valuation date	22 November 2028
Value date	4 September 2025	Maturity date / term	27 November 2028
Initial reference level	The lowest <b>reference level</b> observed on any <b>initial valuation date</b>		

The issuer may terminate the product with immediate effect in the event of obvious written or mathematical errors in the terms and conditions or if certain extraordinary events provided in the terms and conditions occur. Examples of extraordinary events include (1) material changes, particularly in connection with the **underlying**, including where an index ceases to be calculated, and (2) events, in particular due to changes in certain external conditions that hinder the issuer in meeting its obligations in connection with the product or – depending on the terms and conditions of the security – otherwise affect the product and/or the issuer. In case of immediate termination, the return (if any) may be significantly lower than the purchase price, but will reflect the product's market value and, if higher, any minimum redemption (alternatively, in some cases the corresponding compounded amount may be paid out at the product's scheduled maturity). Instead of immediate termination, the issuer may also amend the terms and conditions.

Provided that in the event of any inconsistency and/or conflict between the foregoing paragraph and any applicable law, order, rule or other legal requirement of any governmental or regulatory authority in a territory in which this product is offered, such national requirements shall prevail.

## Intended retail investor

The product is intended for private clients who pursue the objective of general capital formation / asset optimization and have a short-term investment horizon. This product is a product for clients who have sufficient knowledge and / or experience to make an informed investment decision. The investor can bear losses up to the total loss of the capital invested and attaches no importance to capital protection.

## 2. What are the risks and what could I get in return?

## Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 2 years and 9 months. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

## Performance scenarios

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

**The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.**

Recommended holding period:		2 years and 9 months	
Example investment:		EUR 10,000	
Scenarios		If you exit after 1 year	If you exit after 2 years and 9 months (Recommended holding period)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 4,478	EUR 4,503
	Average return each year	-55.2%	-25.0%
Unfavourable	What you might get back after costs	EUR 7,617	EUR 7,096
	Average return each year	-23.8%	-11.6%
Moderate	What you might get back after costs	EUR 10,024	EUR 10,268
	Average return each year	0.2%	1.0%
Favourable	What you might get back after costs	EUR 12,475	EUR 14,828
	Average return each year	24.7%	15.3%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance of the **underlying** over a period of up to 5 years. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## 3. What happens if Deutsche Bank AG, Frankfurt is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see [www.bafin.de](http://www.bafin.de) and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

## 4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

If you exit after 1 year

If you exit after 2 years and 9 months

<b>Total costs</b>	EUR 95	EUR 0
<b>Annual cost impact*</b>	1.0%	0.0% each year
<p>*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.0% before costs and 1.0% after costs.</p> <p>We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.</p>		
<b>Composition of costs</b>	<b>One-off costs upon entry or exit</b>	<b>If you exit after 1 year</b>
<b>Entry costs</b>	0.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 0
<b>Exit costs</b>	1.0% of your investment amount if you return this product before its settlement date. These costs are already included in the price you receive. The costs indicated assume that normal market conditions apply.	EUR 95

## 5. How long should I hold it and can I take money out early?

### Recommended holding period: 2 years and 9 months

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 27 November 2028 (maturity).

In addition to selling the product either (1) through the exchange (where the product is listed) or (2) off-exchange you may exercise the product on the Exercise Dates by transmission of an Exercise Notice to the Issuer. You must instruct your depository bank, which is responsible for the order of the transfer of the specified products. Upon effective exercise you will receive a Redemption Amount as described in more detail under "1. What is this product?" above. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. If you should exercise or sell the product before the end of the sample period, the amount you will receive could be – even significantly – lower than the amount you would have otherwise received.

<b>Exchange listing</b>	Börse Stuttgart and Deutsche Börse AG	<b>Last exchange trading day</b>	23 November 2028 (Börse Stuttgart) and 23 November 2028 (Deutsche Börse AG)
<b>Smallest tradable unit</b>	1 unit	<b>Price quotation</b>	Units

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

## 6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, Germany, by email to: x-markets.team@db.com or at the following website: [www.xmarkets.db.com](http://www.xmarkets.db.com).

## 7. Other relevant information

Any additional documentation in relation to the product and in particular the prospectus, any supplements thereto and the final terms are published on the manufacturer's website ([www.xmarkets.db.com/DocumentSearch](http://www.xmarkets.db.com/DocumentSearch); after entering of the respective ISIN or WKN), all in accordance with legal requirements.
