

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	Protected Participation Certificate Linked to an Index
Product identifiers	ISIN: DE000DB9WSS2 WKN: DB9WSS
PRIIP manufacturer	Deutsche Bank AG. The product issuer is Deutsche Bank AG, Frankfurt.
Website	www.db.com/contact
Telephone number	Call +49-69-910-00 for more information.
Competent authority of the PRIIP manufacturer	Federal Financial Supervisory Authority (BaFin)
Date of production	11 September 2026

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type German law governed equity-linked certificates / Return depends on the performance of the underlying / Full capital protection against market risk

Term The product has a fixed term and will be due on 6 June 2029.

Objectives The product is designed to provide a return in the form of a cash payment on the **maturity date**. The amount of this payment will depend on the performance of the **underlying**.

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

On termination of the product on the **maturity date** you will receive a cash payment directly linked to the performance of the **underlying**. The cash payment will equal (i) EUR 100 multiplied by (ii) (A) the **final reference level** divided by (B) the **initial reference level**. However, if this cash payment is less than EUR 100, you will receive EUR 100 (the minimum payment).

The DB Equity N-LASR Global – EUR Hedged – Excess Return Index is designed to benefit from choosing better performing shares rather than relying on stock markets going up overall. It looks at a large number of companies from developed markets around the world and uses a model to rank them based on financial features such as dividends, profits and debt levels. The Index invests in shares it considers more attractive and takes opposite positions in shares it considers less attractive. By balancing these positions, the aim is to reduce the impact of general market ups and downs and focus instead on differences between individual companies. The model uses many data points and adapts over time, looking at how different factors have worked in the past under various market conditions. The goal is to improve the chances of identifying shares that may perform better or worse in the future.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

Underlying	DB Equity N-LASR Global – EUR Hedged – Excess Return Index; Bloomberg: DBGNLASE Index	Reference level	The closing level of the underlying as per the reference source
Underlying market	Equity	Final reference level	The reference level on the final valuation date
Issue price	EUR 100	Initial valuation date	30 September 2026
Product currency	Euro (EUR)	Final valuation date	1 June 2029
Underlying currency	Euro (EUR)	Maturity date / term	6 June 2029
Subscription period	16 September 2026 (inclusive) to 29 September 2026 16:00 (inclusive)	Index Administrator	Deutsche Bank AG, operating through Deutsche Bank Index Quant ("DBIQ"), a unit within Deutsche Bank AG via its internal processes, which expression shall include any successor in such capacity.
Issue date	29 September 2026	Index Fixing Page	http://index.db.com/
Initial reference level	The reference level on the initial valuation date	Reference source	Deutsche Bank AG, acting through its London Branch.

The issuer may terminate the product with immediate effect in the event of obvious written or mathematical errors in the terms and conditions or if certain extraordinary events provided in the terms and conditions occur. Examples of extraordinary events include (1) material changes, particularly in connection with the **underlying**, including where an index ceases to be calculated, and (2) events, in particular due to changes in certain external conditions that hinder the issuer in meeting its obligations in connection with the product or – depending on the terms and conditions of the security – otherwise affect the product and/or the issuer. In case of immediate termination, the return (if any) may be significantly lower than the purchase price, but will reflect the product's market value and, if higher, any minimum redemption (alternatively, in some cases the corresponding compounded amount may be paid out at the product's scheduled maturity). Instead of immediate termination, the issuer may also amend the terms and conditions.

Intended retail investor

2. What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Recommended holding period:		2 years and 8 months	
Example investment:		EUR 10,000	
Scenarios		If you exit after 1 year	If you exit after 2 years and 8 months (Recommended holding period)
Minimum	EUR 10,000. The return is only guaranteed if you hold the product to maturity. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 9,183	EUR 10,000
	Average return each year	-8.2%	0.0%
Unfavourable	What you might get back after costs	EUR 9,487	EUR 10,000
	Average return each year	-5.1%	0.0%
Moderate	What you might get back after costs	EUR 10,087	EUR 10,810
	Average return each year	0.9%	2.9%
Favourable	What you might get back after costs	EUR 11,059	EUR 12,471
	Average return each year	10.6%	8.6%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Deutsche Bank AG, Frankfurt is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see www.bafin.de and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	<i>If you exit after 1 year</i>	<i>If you exit after 2 years and 8 months</i>
Total costs	EUR 231	EUR 131
Annual cost impact*	2.4%	0.6% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3.4% before costs and 2.9% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	1.4% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 131
Exit costs	1.0% of your investment amount if you return this product before its settlement date. These costs are already included in the price you receive. The costs indicated assume that normal market conditions apply.	EUR 100

5. How long should I hold it and can I take money out early?

Recommended holding period: 2 years and 8 months

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 6 June 2029 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (where the product is listed) or (2) off-exchange. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Börse Stuttgart (EUWAX) and Börse Frankfurt Zertifikate (Regulated market)	Last exchange trading day	31 May 2029 (Börse Stuttgart (EUWAX)) and 31 May 2029 (Börse Frankfurt Zertifikate (Regulated market))
Smallest tradable unit	1 unit	Price quotation	Units

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, Germany, by email to: x-markets.team@db.com or at the following website: www.xmarkets.db.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the prospectus, any supplements thereto and the final terms are published on the manufacturer's website (www.xmarkets.db.com/DocumentSearch ; after entering of the respective ISIN or WKN), all in accordance with legal requirements. In order to obtain more detailed information - and in particular details of the structure and risks associated with an investment in the product - you should read these documents. These documents are also available free of charge from Deutsche Bank AG, Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, Germany, in accordance with legal requirements.
