Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	Protected Participation Certificate Linked to an Index
Product identifiers	ISIN: DE000DB9WWF1 | WKN: DB9WWF
PRIIP manufacturer	Deutsche Bank AG. The product issuer is Deutsche Bank AG, Frankfurt.
Website	www.db.com/contact
Telephone number	Call +49-69-910-00 for more information.
Competent authority of the PRIIP manufacturer	Federal Financial Supervisory Authority (BaFin)
Date of production	19 November 2026

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

German law governed equity-linked certificates / Return depends on the performance of the underlying / Full capital protection against market risk

Term

The product has a fixed term and will be due on 10 December 2030.

Objectives

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment on the **maturity date**. The amount of this payment will depend on the performance of the **underlying**.

On termination of the product on the **maturity date** you will receive a cash payment equal to (i) EUR 100 plus (ii) an amount directly linked to the performance of the **underlying**. This amount will equal (i) EUR 133 multiplied by (ii) (x) (A) the **final reference level** divided by (B) the **initial reference level** minus (y) 100.00%. However, if this cash payment is less than EUR 100, you will receive EUR 100 (the minimum payment).

The DB Equity N-LASR Global – EUR Hedged – Excess Return Index is designed to benefit from choosing better performing shares rather than relying on stock markets going up overall. It looks at a large number of companies from developed markets around the world and uses a model to rank them based on financial features such as dividends, profits and debt levels. The Index invests in shares it considers more attractive and takes opposite positions in shares it considers less attractive. By balancing these positions, the aim is to reduce the impact of general market ups and downs and focus instead on differences between individual companies. The model uses many data points and adapts over time, looking at how different factors have worked in the past under various market conditions. The goal is to improve the chances of identifying shares that may perform better or worse in the future.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

Underlying	DB Equity N-LASR Global – EUR Hedged – Excess Return Index; Bloomberg: DBGNLASE Index	**Reference level**	The closing level of the **underlying** as per the **reference source**
Underlying market	Equity	**Final reference level**	The **reference level** on the **final valuation date**
Issue price	EUR 100	**Initial valuation date**	9 December 2026
Product currency	Euro (EUR)	**Final valuation date**	5 December 2030
Underlying currency	Euro (EUR)	**Maturity date / term**	10 December 2030
Subscription period	25 November 2026 (inclusive) to 8 December 2026 16:00 (inclusive)	**Index Administrator**	Deutsche Bank AG, operating through Deutsche Bank Index Quant ("DBIQ"), a unit within Deutsche Bank AG via its internal processes, which expression shall include any successor in such capacity.
Issue date	8 December 2026	**Index Fixing Page**	http://index.db.com/
Initial reference level	The **reference level** on the **initial valuation date**	**Reference source**	Deutsche Bank AG, acting through its London Branch.

The issuer may terminate the product with immediate effect in the event of obvious written or mathematical errors in the terms and conditions or if certain extraordinary events provided in the terms and conditions occur. Examples of extraordinary events include (1) material changes, particularly in connection with the **underlying**, including where an index ceases to be calculated, and (2) events, in particular due to changes in certain external conditions that hinder the issuer in meeting its obligations in connection with the product or – depending on the terms and conditions of the security – otherwise affect the product and/or the issuer. In case of immediate termination, the return (if any) may be significantly lower than the purchase price, but will reflect the product's market value and, if higher, any minimum redemption (alternatively, in some cases the corresponding compounded amount may be paid out at the product's scheduled maturity). Instead of immediate termination, the issuer may also amend the terms and conditions.

DocHub DocID: 78912698-a90d-4dc2-b13d-98e5c8b09c99

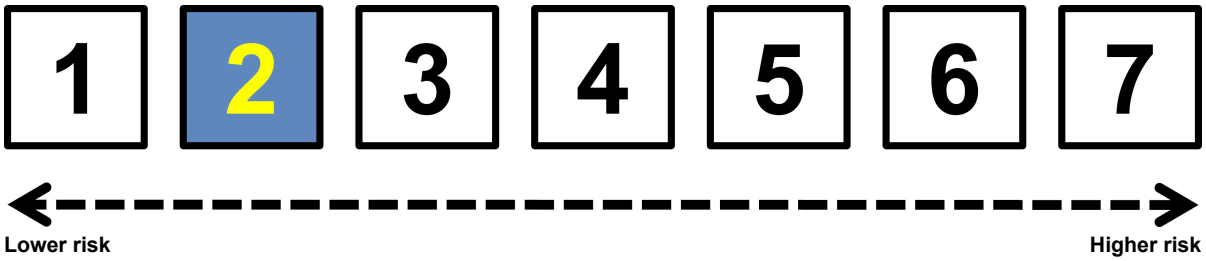

Provided that in the event of any inconsistency and/or conflict between the foregoing paragraph and any applicable law, order, rule or other legal requirement of any governmental or regulatory authority in a territory in which this product is offered, such national requirements shall prevail.

Intended retail investor

The product is intended for private clients who pursue the objective of general capital formation / asset optimization and have a medium-term investment horizon. This product is a product for clients who have sufficient knowledge and / or experience to make an informed investment decision. The investor cannot bear any losses on the capital invested and attaches importance to capital protection.

2. What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product until 10 December 2030. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

You are entitled to receive back at least 100.00% of your capital. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before maturity or in case of immediate termination by the issuer.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		**4 years**	
Example investment:		EUR 10,000	
Scenarios		***If you exit after 1 year***	***If you exit after 4 years (Recommended holding period)***
Minimum	**EUR 10,000. The return is only guaranteed if you hold the product to maturity. You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	EUR 8,838	EUR 10,000
	Average return each year	-11.6%	0.0%
Unfavourable	**What you might get back after costs**	EUR 9,442	EUR 10,000
	Average return each year	-5.6%	0.0%
Moderate	**What you might get back after costs**	EUR 10,421	EUR 11,579
	Average return each year	4.2%	3.7%
Favourable	**What you might get back after costs**	EUR 11,682	EUR 14,498
	Average return each year	16.8%	9.7%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance over up to 5 years of a selected reference asset with movements similar to the underlying asset, as there is not enough available data for the latter. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Deutsche Bank AG, Frankfurt is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see www.bafin.de and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after 1 year	*If you exit after 4 years*
Total costs	EUR 396	EUR 296
Annual cost impact*	4.1%	0.8% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.5% before costs and 3.7% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	3.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 296
Exit costs	1.0% of your investment amount if you return this product before its settlement date. These costs are already included in the price you receive. The costs indicated assume that normal market conditions apply.	EUR 100

5. How long should I hold it and can I take money out early?

Recommended holding period: 4 years

The product aims to provide you with the return described under “1. What is this product?” above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 10 December 2030 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (where the product is listed) or (2) off-exchange. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Börse Stuttgart (EUWAX) and Börse Frankfurt Zertifikate (Regulated market)	**Last exchange trading day**	4 December 2030 (Börse Stuttgart (EUWAX)) and 4 December 2030 (Börse Frankfurt Zertifikate (Regulated market))
Smallest tradable unit	1 unit	**Price quotation**	Units

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at the following address: Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, Germany, by email to: x-markets.team@db.com or at the following website: www.xmarkets.db.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the prospectus, any supplements thereto and the final terms are published on the manufacturer’s website (www.xmarkets.db.com/DocumentSearch ; after entering of the respective ISIN or WKN), all in accordance with legal requirements. In order to obtain more detailed information - and in particular details of the structure and risks associated with an investment in the product - you should read these documents. These documents are also available free of charge from Deutsche Bank AG, Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, Germany, in accordance with legal requirements.
