

Key Information Document

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	Drop-Back Certificate linked to S&P 500® Index (Preisindex)
Product identifiers	ISIN: XS0459858659 WKN: DB2DYB
PRIIP manufacturer	Deutsche Bank AG. The product issuer is Deutsche Bank AG, Frankfurt.
Website	www.db.com/contact
Telephone number	Call +49-69-910-00 for more information.
Competent authority of the PRIIP manufacturer	German Federal Financial Supervisory Authority (BaFin)
Date of production	14 January 2022

You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type German law governed certificates

Objectives

(Terms that appear in bold in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of (1) a coupon payment (if any) on the **maturity date** and (2) a cash payment on the **maturity date**. The amount of this payment will depend on the performance of the **underlying**.

Investment allocation: This product is split into two different asset allocations: part of the **product notional amount** will be initially invested into cash generating a coupon payment (the cash allocation) and the other part will expose the investor to the **underlying** (the underlying investment allocation). The exposure between the respective allocations will be adjusted during the lifetime of the product if one or more trigger events occur. On the **initial valuation date**, 60.00% of the **product notional amount** will be invested into the cash allocation and 40.00% of the **product notional amount** will be invested into the underlying investment allocation.

Trigger event: A trigger event will occur if the **reference level**, on any scheduled trading day during the **trigger observation period**, is at or below the corresponding **trigger level** for the first time. If a trigger event occurs, 20.00% of the **product notional amount** will be deducted from the cash allocation and immediately reinvested into the underlying investment allocation. For the avoidance of doubt, multiple trigger events can occur at the same time.

Trigger levels
4,296.546
4,070.412
3,844.278

Coupon: On the **maturity date** you will receive a coupon payment equal to the sum of daily coupon amounts accrued on each calendar day during the **coupon period**. A daily coupon amount in respect of a calendar day is calculated as the coupon rate of 2.80% multiplied by the outstanding cash allocation on such day and divided by 360. If a trigger event occurs, the daily coupon amounts that will be accrued on each calendar day will decrease following the occurrence of such trigger event and therefore the value of your coupon payment will be reduced. If all trigger events have occurred, no daily coupon amounts will be accrued following the occurrence of the last trigger event.

Underlying investment allocation: On the **final valuation date**, the underlying investment allocation amount will depend on the performance of the **underlying** and on the number of trigger events that have occurred. This amount will be equal to (A) the underlying investment allocation on the **initial valuation date** multiplied by (i) the **final reference level** divided by (ii) the **initial reference level** plus (B) the sum of, for each trigger event that has occurred (if any), (i) 20.00% of the **product notional amount** reinvested into the underlying investment allocation multiplied by (ii) the **final reference level** divided by (iii) the **reference level** in respect of the scheduled trading day on which such trigger event occurred.

Termination on the maturity date: On the **maturity date** you will receive a cash amount equal to (A) the remaining cash allocation (if any) plus (B) the underlying investment allocation.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

When purchasing this product during its lifetime, the purchase price may include accrued coupon on a pro rata basis.

You do not have any entitlement to a dividend from the **underlying** and you have no right to any further entitlement resulting from the **underlying** (e.g., voting rights).

Underlying	S&P 500 (Price return index) (ISIN: US78378X1072)	Reference level	The closing level of the underlying as per the reference source
Underlying market	Equity	Reference source	New York Stock Exchange, New York
Product notional amount	USD 100	Final reference level	The reference level on the valuation date
Product currency	U.S. Dollar (USD)	Valuation date	27 August 2025
Underlying currency	U.S. Dollar (USD)	Maturity date / term	2 September 2025
Issue date	31 August 2021	Coupon period	The period from 2 September 2021 (inclusive) to the maturity date (exclusive)
Initial reference level	4,522.68	Trigger observation period	31 August 2021 (inclusive) to 27 August 2025 (inclusive)

The issuer may terminate the product with immediate effect in the event of obvious written or mathematical errors in the terms and conditions or if certain extraordinary events provided in the terms and conditions occur. Examples of extraordinary events include (1) material changes, particularly in connection with the **underlying**, including where an index ceases to be calculated, and (2) events, in particular due to changes in certain external conditions that hinder the issuer in meeting its obligations in connection with the product or – depending on the terms and conditions of the security – otherwise affect the product and/or the issuer. In case of immediate termination, the return (if any) may be significantly lower than the purchase price, but will reflect the product's market value and, if higher, any minimum redemption (alternatively, in some cases the corresponding compounded amount may be paid out at the product's scheduled maturity). Instead of immediate termination, the issuer may also amend the terms and conditions.

Provided that in the event of any inconsistency and/or conflict between the foregoing paragraph and any applicable law, order, rule or other legal requirement of any governmental or regulatory authority in a territory in which this product is offered, such national requirements shall prevail.

Intended retail investor

The product is intended for private clients who pursue the objective of general capital formation/asset optimization and have a medium-term investment horizon. This product is a product for clients who have sufficient knowledge and / or experience to make an informed investment decision. The investor can bear losses up to the total loss of the capital invested and attaches no importance to capital protection.

2. What are the risks and what could I get in return?

Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

Market developments in the future cannot be accurately predicted. The scenarios shown are only an indication of some of the possible outcomes based on recent returns. Actual returns could be lower.

Investment: USD 10,000

Scenarios		1 year	2 years	3 years and 7 months (Recommended holding period)
Stress scenario	What you might get back after costs	USD 5,905.53	USD 5,874.16	USD 5,102.23
	Average return each year	-40.94%	-23.36%	-16.89%
Unfavourable scenario	What you might get back after costs	USD 7,816.19	USD 7,043.93	USD 6,460.84
	Average return each year	-21.84%	-16.07%	-11.32%
Moderate scenario	What you might get back after costs	USD 9,684.46	USD 9,990.52	USD 10,327.06
	Average return each year	-3.16%	-0.05%	0.89%
Favourable scenario	What you might get back after costs	USD 10,971.00	USD 11,986.40	USD 13,682.90
	Average return each year	9.71%	9.48%	9.01%

This table shows the money you could get back over the next 3 years and 7 months under different scenarios, assuming that you invest USD 10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

This product cannot be easily cashed in. This means it is difficult to estimate how much you would get back if you cash in before maturity. You will either be unable to cash in early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Deutsche Bank AG, Frankfurt is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors

to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see www.bafin.de and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest USD 10,000. The figures are estimates and may change in the future.

Costs over time

<i>Investment: USD 10,000</i>			
<i>Scenarios</i>	<i>If you cash in after 1 year</i>	<i>If you cash in after 2 years</i>	<i>If you cash in at the end of the recommended holding period</i>
Total costs	USD 98.36	USD 98.36	USD 0.00
Impact on return (RIY) per year	0.98357%	0.49082%	0.00%

The costs shown in the table above represent how much the expected costs of the product would affect your return, assuming the product performs in line with the moderate performance scenario.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

The table shows the impact on return per year.

One-off costs	<i>Entry costs</i>	0.00%	The impact of the costs already included in the price.
	<i>Exit costs</i>	0.00%	The impact of the costs of exiting your investment when it matures.
Ongoing costs	<i>Portfolio transaction costs per year</i>	0.00%	The impact of the costs of us buying and selling underlying investments for the product.
	<i>Other ongoing costs</i>	0.00%	The impact of the costs that we take each year for managing your investments.

5. How long should I hold it and can I take money out early?

Recommended holding period: 3 years and 7 months

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 2 September 2025 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product off-exchange. No fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Luxembourg Stock Exchange (Main Segment)	Last exchange trading day	26 August 2025
Smallest tradable unit	1 unit	Price quotation	Units

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?

Any complaint regarding the conduct of the person advising on, or selling, the product can be submitted directly to that person.

Any complaint regarding the product or the conduct of the manufacturer of this product can be submitted in writing at:

Jurisdiction	Postal address	Email address	Website
