You are about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type German law governed equity-linked certificates / Return depends on the performance of the underlying / No capital protection against market risk

Term The product has a fixed term and will be due on 5 October 2026.

Objectives The product is designed to provide a return in the form of (1) a coupon payment (if any) on the **maturity date** and (2) a cash payment on the **maturity date**. The amount of this payment will depend on the performance of the **underlying**.

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

Investment allocation: This product is split into two different asset allocations: part of the **unit reference amount** will be initially invested into cash generating a coupon payment (the cash allocation) and the other part will expose the investor to the **underlying** (the underlying investment allocation). The exposure between the respective allocations will be adjusted during the lifetime of the product if one or more trigger events occur. On the **initial valuation date**, 60.00% of the **unit reference amount** will be invested into the cash allocation and 40.00% of the **unit reference amount** will be invested into the underlying investment allocation.

Trigger event: A trigger event will occur if the **reference level**, on any scheduled trading day during the **trigger observation period**, is at or below the corresponding **trigger level** for the first time. If a trigger event occurs, 20.00% of the **unit reference amount** will be deducted from the cash allocation and immediately reinvested into the underlying investment allocation. For the avoidance of doubt, multiple trigger events can occur at the same time.

Trigger levels
13,353.813
11,870.056
10,386.299

Coupon: On the **maturity date** you will receive a coupon payment equal to the sum of daily coupon amounts accrued on each calendar day during the **coupon period**. A daily coupon amount in respect of a calendar day is calculated as the coupon rate of 6.60% per annum multiplied by the outstanding cash allocation on such day and divided by 360. If a trigger event occurs, the daily coupon amounts that will be accrued on each calendar day will decrease following the occurrence of such trigger event and therefore the value of your coupon payment will be reduced. If all trigger events have occurred, no daily coupon amounts will be accrued following the occurrence of the last trigger event.

Underlying investment allocation: On the **final valuation date**, the underlying investment allocation amount will depend on the performance of the **underlying** and on the number of trigger events that have occurred. This amount will be equal to (A) the underlying investment allocation on the **initial valuation date** multiplied by (i) the **final reference level** divided by (ii) the **initial reference level** plus (B) the sum of, for each trigger event that has occurred (if any), (i) 20.00% of the **unit reference amount** reinvested into the underlying investment allocation multiplied by (ii) the **final reference level** divided by (iii) the **reference level** in respect of the scheduled trading day on which such trigger event occurred.

Termination on the maturity date: On the **maturity date** you will receive a cash amount equal to (A) the remaining cash allocation (if any) plus (B) the underlying investment allocation.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

When purchasing this product during its lifetime, the purchase price may include accrued coupon on a pro rata basis.

You do not have any entitlement to a dividend from the **underlying** and you have no right to any further entitlement resulting from the **underlying** (e.g., voting rights).

might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period, you do not have a guarantee and you may have to pay extra costs.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Deutsche Bank AG, Frankfurt is unable to pay out?

You are exposed to the risk that the issuer might be unable to fulfil its obligations in respect of the product – e.g. in the event of insolvency (inability to pay / over-indebtedness) or an administrative order of resolution measures. In case of a crisis of the issuer such an order can also be issued by a resolution authority in the run-up of an insolvency proceeding. In doing so, the resolution authority has extensive intervention powers. Among other things, it can reduce rights of the investors to zero, terminate the product or convert it into shares of the issuer and suspend rights of the investors. With regard to the basic ranking of the issuer's obligations in the event of action by the resolution authority, please see www.bafin.de and search for the keyword "Haftungskaskade". A total loss of your capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- You would get back the amount that you invested (0% return).
- USD 10,000 is invested

<i>If you exit after 5 months and 3 weeks</i>	
Total costs	USD 0
Cost impact*	0.0%

*This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 5 months and 3 weeks
Entry costs	0.0% of the amount you pay when entering this investment. These costs are already included in the price you pay.	USD 0
Exit costs	0.0% of your investment amount if you return this product before its settlement date. These costs are already included in the price you receive. The costs indicated assume that normal market conditions apply.	USD 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 5 months and 3 weeks

The product aims to provide you with the return described under "1. What is this product?" above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 5 October 2026 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product off-exchange. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction. However if you sell the product in the secondary market you will incur a bid/offer spread. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.
