Autocallable Note will be redeemed early at 100% of the Nominal Amount

3. Redemption at maturity, subject to early redemption

a) On the Settlement Date investors receive the Nominal Amount, if the Final Reference Level of every Basket Constituent is equal to or above the respective Barrier.

b) If the Final Reference Level of at least one Basket Constituent is, as specified in the Final Terms, below the respective Barrier, investors receive a Cash Amount equal to the product of (i) the Nominal Amount and (ii) the quotient of the Final Reference Level of the Basket Constituent which, based on its respective Initial Reference Level, has at maturity of the Worst of Basket Autocallable Note the worst performance of all Basket Constituents divided by its Initial Reference Level. The Performance of a Basket Constituent is determined as the quotient of (A) the difference between its Final Reference Level and its Initial Reference Level, and (B) its Initial Reference Level.

Element	Section D – Risks	
<b>D.2</b>	Key information on the key risks that are specific and individual to the issuer	<p>Investors will be exposed to the risk of the Issuer becoming insolvent as result of being overindebted or unable to pay debts, i.e. to the risk of a temporary or permanent inability to meet interest and/or principal payments on time. The Issuer's credit ratings reflect the assessment of these risks.</p> <p>Factors that may have a negative impact on Deutsche Bank's profitability are described in the following:</p> <ul style="list-style-type: none"> <li>Recent tepid economic growth, and uncertainties about prospects for growth going forward, especially in Deutsche Bank's home market of Europe, have affected and continue to negatively affect Deutsche Bank's results of operations and financial condition in some of its businesses and Deutsche Bank's strategic plans, while a continuing low interest environment and competition in the financial services industry have compressed margins in many of the Group's</li> </ul>

		<p>businesses. If these conditions persist or worsen, Deutsche Bank's business, results of operations or strategic plans could be adversely affected.</p> <ul style="list-style-type: none"><li>• Deutsche Bank's results of operation and financial condition, in particular those of its Global Markets corporate division, continue to be negatively impacted by the challenging market environment, unfavourable macro-economic and geopolitical conditions, lower client activities, increased competition and regulation, and the immediate impacts resulting from Deutsche Bank's strategic decisions as Deutsche Bank makes progress on the implementation of its strategy. If Deutsche Bank is unable to improve its profitability as it continues to face these headwinds as well as persistently high litigation costs, Deutsche Bank may be unable to meet many of its strategic aspirations, and may have difficulty maintaining capital, liquidity and leverage ratios at levels expected by market participants and Deutsche Bank's regulators.</li><li>• Continued elevated levels of political uncertainty could have unpredictable consequences for the financial system and the greater economy, and could contribute to an unwinding of aspects of European integration, potentially leading to declines in business levels, write-downs of assets and losses across Deutsche Bank's businesses. Deutsche Bank's ability to protect itself against these risks is limited.</li><li>• Deutsche Bank may be required to take impairments on its exposures to the sovereign debt of European or other countries if the European sovereign debt crisis reignites. The credit default swaps into which Deutsche Bank has entered to manage sovereign credit risk may not be available to offset these losses.</li><li>• Deutsche Bank's liquidity, business activities and profitability may be adversely affected by an inability to access the debt capital markets or to sell assets during periods of market-wide or firm-specific liquidity constraints. Credit rating downgrades have contributed to an increase in Deutsche Bank's funding costs, and any future downgrade could materially adversely affect its funding costs, the willingness of counterparties to continue to do business with it and significant aspects of its business model.</li><li>• Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have created significant uncertainty for Deutsche Bank and may adversely affect its business and ability to execute its strategic plans, and competent regulators may prohibit Deutsche Bank from making dividend payments or payments on its regulatory capital instruments or take other actions if Deutsche Bank fails to comply with regulatory requirements.</li><li>• European and German legislation regarding the recovery and resolution of banks and investment firms could, if steps were taken to ensure Deutsche Bank's resolvability or resolution measures were imposed on Deutsche Bank, significantly affect Deutsche Bank's business operations, and lead to losses for its shareholders and creditors.</li><li>• Regulatory and legislative changes require Deutsche Bank to</li></ul>

		<p>maintain increased capital, in some cases (including in the United States) applying liquidity, risk management and capital adequacy rules to its local operations on a standalone basis. These requirements may significantly affect Deutsche Bank's business model, financial condition and results of operations as well as the competitive environment generally. Any perceptions in the market that Deutsche Bank may be unable to meet its capital or liquidity requirements with an adequate buffer, or that Deutsche Bank should maintain capital in excess of these requirements, could intensify the effect of these factors on Deutsche Bank's business and results.</p> <ul style="list-style-type: none"> <li>• Deutsche Bank's regulatory capital and liquidity ratios and its funds available for distributions on its shares or regulatory capital instruments will be affected by Deutsche Bank's business decisions and, in making such decisions, Deutsche Bank's interests and those of the holders of such instruments may not be aligned, and Deutsche Bank may take decisions in accordance with applicable law and the terms of the relevant instruments that result in no or lower payments being made on Deutsche Bank's shares or regulatory capital instruments.</li> <li>• Legislation in the United States and in Germany as well as proposals in the European Union regarding the prohibition of proprietary trading or its separation from the deposit-taking business may materially affect Deutsche Bank's business model.</li> <li>• Other regulatory reforms adopted or proposed in the wake of the financial crisis – for example, extensive new regulations governing Deutsche Bank's derivatives activities, compensation, bank levies, deposit protection or a possible financial transaction tax – may materially increase Deutsche Bank's operating costs and negatively impact its business model.</li> <li>• Adverse market conditions, asset price deteriorations, volatility and cautious investor sentiment have affected and may in the future materially and adversely affect Deutsche Bank's revenues and profits, particularly in its investment banking, brokerage and other commission- and fee-based businesses. As a result, Deutsche Bank has in the past incurred and may in the future incur significant losses from its trading and investment activities.</li> <li>• Deutsche Bank announced the next phase of its strategy in April 2015, gave further details on it in October 2015 and announced an update in March 2017. If Deutsche Bank is unable to implement its strategic plans successfully, it may be unable to achieve its financial objectives, or Deutsche Bank may incur losses or low profitability or erosions of its capital base, and Deutsche Bank's financial condition, results of operations and share price may be materially and adversely affected.</li> <li>• As part of its March 2017 updates to its strategy, Deutsche Bank announced its intention to reconfigure its Global Markets, Corporate Finance and Transaction Banking businesses into a single, corporate client-led Corporate &amp; Investment Banking division to position itself for growth through increased cross-selling opportunities for its higher return corporate clients. Clients may choose not to expand their businesses or portfolios with Deutsche</li> </ul>

		<p>Bank, thereby negatively influencing its ability to capitalise on these opportunities.</p> <ul style="list-style-type: none"><li>• As part of its March 2017 updates to its strategy, Deutsche Bank announced its intention to retain and combine Deutsche Postbank AG (together with its subsidiaries, "Postbank") with its existing retail and commercial operations, after earlier having announced its intention to dispose of Postbank. Deutsche Bank may face difficulties integrating Postbank into the Group following the completion of operational separability from the Group. Consequently, the cost savings and other benefits Deutsche Bank expects to realise may only come at a higher cost than anticipated, or may not be realised at all.</li><li>• As part of its March 2017 updates to its strategy, Deutsche Bank announced its intention to create an operationally segregated Deutsche Asset Management division through a partial initial public offer (IPO). If economic or market conditions, or the financial position, results of operations and business prospects of Deutsche AM, are unfavourable, or if any required regulatory approvals are not obtained or would be available only on disadvantageous terms, Deutsche Bank may not be able to sell a stake in Deutsche AM at a favourable price or timing, or at all. Additionally, Deutsche Bank may not be able to capitalise on the expected benefits that it believes an operationally segregated Deutsche AM can offer.</li><li>• Deutsche Bank may have difficulties selling companies, businesses or assets at favourable prices or at all and may experience material losses from these assets and other investments irrespective of market developments.</li><li>• A robust and effective internal control environment is necessary to ensure that Deutsche Bank conducts its business in compliance with the laws and regulations applicable to it. Deutsche Bank has identified the need to strengthen its internal control environment and has embarked on initiatives to accomplish this. If these initiatives are not successful or are delayed, Deutsche Bank's reputation, regulatory position and financial condition may be materially adversely affected, and Deutsche Bank's ability to achieve its strategic ambitions may be impaired.</li><li>• Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing Deutsche Bank to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm.</li><li>• Deutsche Bank is currently subject to a number of investigations by regulatory and law enforcement agencies globally as well as associated civil actions relating to potential misconduct. The eventual outcomes of these matters are unpredictable, and may materially and adversely affect Deutsche Bank's results of operations, financial condition and reputation.</li><li>• In addition to its traditional banking businesses of deposit-taking and lending, Deutsche Bank also engages in nontraditional credit businesses in which credit is extended in transactions that include, for example, its holding of securities of third parties or its engaging in</li></ul>
--	--	---

		<p>complex derivative transactions. These nontraditional credit businesses materially increase Deutsche Bank's exposure to credit risk.</p> <ul style="list-style-type: none"> <li>• A substantial proportion of the assets and liabilities on Deutsche Bank's balance sheet comprise financial instruments that it carries at fair value, with changes in fair value recognised in its income statement. As a result of such changes, Deutsche Bank has incurred losses in the past, and may incur further losses in the future.</li> <li>• Deutsche Bank's risk management policies, procedures and methods leave it exposed to unidentified or unanticipated risks, which could lead to material losses.</li> <li>• Operational risks, which may arise from errors in the performance of Deutsche Bank's processes, the conduct of Deutsche Bank's employees, instability, malfunction or outage of Deutsche Bank's IT system and infrastructure, or loss of business continuity, or comparable issues with respect to Deutsche Bank's vendors, may disrupt Deutsche Bank's businesses and lead to material losses.</li> <li>• Deutsche Bank's operational systems are subject to an increasing risk of cyber attacks and other internet crime, which could result in material losses of client or customer information, damage Deutsche Bank's reputation and lead to regulatory penalties and financial losses.</li> <li>• The size of Deutsche Bank's clearing operations exposes Deutsche Bank to a heightened risk of material losses should these operations fail to function properly.</li> <li>• Deutsche Bank may have difficulty in identifying and executing acquisitions, and both making acquisitions and avoiding them could materially harm Deutsche Bank's results of operations and its share price.</li> <li>• Intense competition, in Deutsche Bank's home market of Germany as well as in international markets, could materially adversely impact Deutsche Bank's revenues and profitability.</li> </ul> <p>Transactions with counterparties in countries designated by the U.S. State Department as state sponsors of terrorism or persons targeted by U.S. economic sanctions may lead potential customers and investors to avoid doing business with Deutsche Bank or investing in Deutsche Bank's securities, harm Deutsche Bank's reputation or result in regulatory action which could materially and adversely affect Deutsche Bank's business.</p>
D.6	Key information on the risks that are specific and individual to the securities and risk warning to the effect that investors may lose the value of their entire investment or part of it	<p><b>Securities are linked to the Underlying</b></p> <p>Amounts payable periodically or on exercise or redemption of the Securities, as the case may be, are linked to the Underlying which may comprise one or more Reference Item(s). The purchase of, or investment in, Securities linked to the Underlying involves substantial risks.</p> <p>The Securities are not conventional securities and carry various unique investment risks which prospective investors should understand clearly before investing in the Securities. Each prospective investor in the Securities should be familiar with securities having characteristics similar to the Securities and should fully review all documentation for and understand the Terms and Conditions of the Securities and the nature and extent of its exposure to risk of loss.</p> <p>Potential investors should ensure that they understand the relevant formula in</p>

		<p>accordance with which the amounts payable are calculated, and if necessary seek advice from their own adviser(s).</p> <p><b>Risks associated with the Underlying</b></p> <p>Because of the Underlying's influence on the entitlement from the Security, as with a direct investment in the Underlying, investors are exposed to risks both during the term and also at maturity, which are also generally associated with an investment in the respective index in general.</p> <p><b>Currency risks</b></p> <p>Investors face an exchange rate risk if the Settlement Currency is not the currency of the investor's home jurisdiction.</p> <p><b>Early Termination</b></p> <p>The Terms and Conditions of the Securities include a provision pursuant to which, where certain conditions are satisfied, the Issuer is entitled to redeem the Securities early. As a result, the Securities may have a lower market value than similar securities which do not contain any such Issuer's right for redemption. During any period where the Securities may be redeemed in this way, the market value of the Securities generally will not rise substantially above the price at which they may be redeemed or cancelled. The same applies where the Terms and Conditions of the Securities include a provision for an automatic redemption or cancellation of the Securities (e.g. "knock-out" or "auto call" provision).</p> <p><b>Regulatory bail-in and other resolution measures</b></p> <p>If the competent authority determines that the Issuer is failing or likely to fail and certain other conditions are met, the competent resolution authority has the power to write down, including to write down to zero, claims for payment of the principal and any other claims under the Securities respectively, interest or any other amount in respect of the Securities, to convert the Securities into ordinary shares or other instruments qualifying as common equity tier 1 capital (the write-down and conversion powers commonly being referred to as the bail-in tool), or to apply other resolution measures including (but not limited to) a transfer of the Securities to another entity, a variation of the terms and conditions of the Securities or a cancellation of the Securities.</p> <p><b>Risks at maturity</b></p> <p>If the Final Reference Level of at least one Basket Constituent is, as specified in the Final Terms, below the respective Barrier, the Cash Amount plus any Coupon Payments may be less than the purchase price of the Worst of Basket Autocallable Note. In such case investors will suffer a loss. At worst, the investor may suffer a total loss of capital invested if the Final Reference Level of the Basket Constituent with the worst performance is zero.</p> <p><b>Possible total loss</b></p> <p>Where no minimum cash amount is specified investors may experience a total loss of their investment in the Security.</p>
