The Prospectus (including any supplements), under which the Securities described in these Final Terms are being issued, will cease to be valid when the Securities Note dated 27 September 2022 ceases to be valid (12 months after approval), and is therefore valid until 28 September 2023. From that date, these Final Terms must be read together with the respective current version of the Securities Note and the respective current version of the Registration Document, as published on the website www.xmarkets.db.com.

This document constitutes the Final Terms of the Securities described herein and comprises the following parts:

Economic terms of the Securities

Terms and Conditions (Specific Terms of the Securities)

Further information about the offering of the Securities

Issue-specific summary

These Final Terms have been prepared for the purposes of Article 8(5) of the Prospectus Regulation and must be read in conjunction with the Base Prospectus, comprising the Securities Note dated 27 September 2022 (the "Securities Note") and the Registration Document dated 4 May 2022, as supplemented (the "Registration Document"), in order to obtain all relevant information. Full information on the Issuer and the Securities is only available on the basis of the combination of these Final Terms, the Securities Note and the Registration Document.

WKN/ISIN: DB2E0A / XS0460020752

The Securities Note dated 27 September 2022, the Registration Document dated 4 May 2022, any supplements to the Base Prospectus or the Registration Document, and the Final Terms are published, in accordance with Article 21(2)(a) of the Prospectus Regulation, in electronic form on the Issuer's website (www.xmarkets.db.com).

In addition, the Securities Note dated 27 September 2022, and the Registration Document dated 4 May 2022 and any supplements to the Base Prospectus or the Registration Document shall be available free of charge at the registered office of the Issuer, Deutsche Bank AG, Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, and its Milan branch, Via Filippo Turati 27, 20121 Milan, Italy.

A summary of the individual issuance is annexed to the Final Terms.

Terms not otherwise defined herein shall have the meaning given in the General Conditions of the Securities set out in the Terms and Conditions.

Economic terms of the Securities

The following description of the Security explains the economic terms of the Security and its characteristics.

Product No. 74: Certificate with Coupon Observation Dates and with European Barrier Observation
--

The Coupon Certificate with Coupon Observation Dates and European Barrier Observation is linked to the performance of the Underlying. The way the Coupon Certificate with Coupon Observation Dates with European Barrier Observation works results from three key features:

1. Coupon payments

Coupon Payment is conditional. In the case of a conditional Coupon Payment, if the coupon condition does not occur on a Coupon Observation Date, a missed Coupon Payment will be made at a later Coupon Payment Date, provided that the coupon condition does occur on the respective Coupon Observation Date.

If Coupon Payment is conditional and

- a) if the Underlying closes equal to or above the Coupon Threshold, investors will receive the Coupon Amount (Coupon Payment) at the next Coupon Payment Date.
- b) if the Underlying does not close equal to or above the Coupon Threshold, no Coupon Payment will be made at the next Coupon Payment Date. If specified in the Final Terms, the Coupon Payment will be made at a later Coupon Payment Date, if the Underlying closes, as specified in the Final Terms, equal to or above the Coupon Threshold. If the Underlying does not close equal to or above the Coupon Threshold on any of the subsequent Coupon Observation Dates, no Coupon Payments will be made under the Coupon Certificate with Coupon Observation Dates with European Barrier Observation.

2. Early redemption

If the Underlying closes equal to or above the relevant Redemption Threshold on one of the Observation Dates, the Coupon Certificate with Coupon Observation Dates and European Barrier Observation will be redeemed early at the Specified Reference Level. Coupon Payments due or, if the Final Terms specify conditional Coupon Payments, any Coupon Payments, will be made additionally should the coupon conditions occur.

3. Redemption at maturity

If there is no early redemption, investors will receive a Cash Amount on the Settlement Date which is determined depending on the performance of the Underlying as follows:

- a) If the Final Reference Level is equal to or above the Barrier, investors will receive a Cash Amount in the amount of the Specified Reference Level on the Settlement Date.
- b) If the Final Reference Level is below the Barrier, the Coupon Certificate with Coupon Observation Dates and European Barrier Observation will participate 1:1

in the negative performance of the Underlying based on the Initial Reference Level.

If the Final Terms specify this, Coupon Payments due or, if the Final Terms specify conditional Coupon Payments, any Coupon Payments, will be made additionally should the coupon conditions occur.

Investors limit their return to the Specified Reference Level and Coupon Payments in return for the possibility of early redemption.

Investors also have no claims to the/deriving from the Underlying.

Terms and Conditions

The following "**Specific Terms of the Securities**" relating to the Securities shall, for the relevant Series of Securities, complete and put in concrete terms the General Conditions of the Securities for the purposes of such Series of Securities. The Specific Terms of the Securities and the General Conditions of the Securities together constitute the "**Terms and Conditions**" of the relevant Securities.

Determination of the price by the Issuer Both the Initial Issue Price of the *Certificate with Coupon Observation Dates and with European Barrier Observation* and the bid and ask prices quoted by the Issuer during its term are based on the Issuer's internal pricing models. Accordingly, unlike in an on exchange trading, for example for shares, the prices quoted during the term are not based on supply and demand. The prices in particular contain a margin which the Issuer determines at its free discretion and which may cover, in addition to the Issuer's proceeds, the costs of structuring, market making and settlement of the *Certificate with Coupon Observation Dates and with European Barrier Observation*, any applicable sales costs (distribution fee) and other costs.

Distribution fee Placement fee: up to 5.00 per cent of the Issue Price. The Issuer will either pay the placement fee from the issue proceeds as a one-off turnover-related distribution fee to the bank that sold the *Certificate with Coupon Observation Dates and with European Barrier Observation* to the customer (principal bank), or grant the latter a corresponding discount from the Initial Issue Price.

The Bank has operations or dealings with existing and potential customers in most countries in the world. These operations and dealings include working through:

- subsidiaries and branches in many countries;
- representative offices in many other countries; and
- one or more representatives assigned to serve customers in a large number of additional countries.

Major shareholders, including whether it is directly or indirectly owned or controlled and by whom

Deutsche Bank is neither directly nor indirectly majority-owned or controlled by any other corporation, by any government or by any other natural or legal person severally or jointly.

Pursuant to German law and Deutsche Bank's Articles of Association, to the extent that the Bank may have major shareholders at any time, it may not give them different voting rights from any of the other shareholders.

Deutsche Bank is not aware of arrangements which may at a subsequent date result in a change of control of the company.

The German Securities Trading Act (*Wertpapierhandelsgesetz*) requires investors in publicly-traded corporations whose investments reach certain thresholds to notify both the corporation and the German Federal Financial Supervisory Authority (*Bundesanstalt für Finanzdienstleistungsaufsicht*) of such change within four trading days. The minimum disclosure threshold is 3 per cent. of the corporation's issued voting share capital. To the Bank's knowledge, there are only five shareholders holding more than 3 per cent. of Deutsche Bank shares or to whom more than 3 per cent. of voting rights are attributed, and none of these shareholders holds more than 10 per cent. of Deutsche Bank shares or voting rights

What are the key risks that are specific to the issuer?

The Issuer is subject to the following key risks:

Macroeconomic, Geopolitical and Market Environment: As a corporate and investment bank with a large private client franchise, our businesses are materially affected by global macroeconomic and financial market conditions. Significant challenges may arise from economic growth prospects, the interest rate environment, inflationary pressure, supply chain disruptions, geopolitical risks as well as higher market volatility, potential deterioration of international trade relations, and weakness of global, regional and national economic conditions. Such risks exist in particular with respect to the COVID-19 pandemic and its ongoing impacts, and the large-scale Russian military action against Ukraine. Other risks exist with respect to China and from political and economic instability in key markets.

Business and Strategy: Our results of operation and financial condition have in the past been negatively impacted by the challenging market environment, uncertain macroeconomic and geopolitical conditions, lower levels of client activity, increased competition and regulation, and the immediate impact of our strategic decisions. If we are unable to improve our profitability, we may be unable to meet our strategic aspirations, and may have difficulty maintaining capital, liquidity and leverage at levels expected by market participants and our regulators.

Regulation and Supervision: Regulatory reforms enacted and proposed in response to weaknesses in the financial sector, together with increased regulatory scrutiny more generally, have had and continue to have a significant impact on us and may adversely affect our business and ability to execute our strategic plans. Competent regulators may prohibit us from making dividend payments or payments on our regulatory capital instruments or take other actions if we fail to comply with regulatory requirements.

Internal Control Environment: A robust and effective internal control environment and adequate infrastructure (comprising people, policies and procedures, controls testing and IT systems) are necessary to ensure that we conduct our business in compliance with the laws, regulations and associated supervisory expectations applicable to us. We have identified the need to strengthen our internal control environment and infrastructure and have embarked on initiatives to accomplish this. If these initiatives are not successful or proceed too slowly, our reputation, regulatory position and financial condition may be materially adversely affected, and our ability to achieve our strategic ambitions may be impaired.

Litigation, Regulatory Enforcement Matters and Investigations: We operate in a highly and increasingly regulated and litigious environment, potentially exposing us to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm.

Environmental, Social and Governance (ESG)-Related Changes: The impacts of rising global temperatures, and the enhanced focus on climate change and the transition to a "net-zero" economy from society, our regulators and the banking sector, have led to the emergence of new and increasing sources of financial and non-financial risks. These include the physical risks arising from extreme weather events which are growing in frequency and severity, transition risks as carbon-intensive sectors are faced with higher taxation, reduced demand and potentially restricted access to financing, and risks relating to the portrayal of ESG aspect of activities. These risks can impact Deutsche Bank across a broad range of financial and non-financial risk types.

Section C – Key information on the securities

WKN/ISIN: DB2E0A / XS0460020752

What are the main features of the securities?

Type of securities

The Securities are *Certificates*.

Class of securities

The Securities will be represented by a global security (the "**Global Security**"). No definitive Securities will be issued. The Securities will be issued in bearer form.

Securities identification number(s) of the securities

ISIN: XS0460020752 / WKN: DB2E0A

Applicable law of the securities

The Securities will be governed by German law. The constituting of the Securities may be governed by the laws of the jurisdiction of the Clearing Agent.

Restrictions on the free transferability of the securities

Each Security is transferable in accordance with applicable law and any rules and procedures for the time being of any Clearing Agent through whose books such Security is transferred.

Status of the securities

The Securities constitute unsecured and unsubordinated preferred liabilities of the Issuer ranking *pari passu* among themselves and *pari passu* with all other unsecured and unsubordinated preferred liabilities of the Issuer, subject, however, to statutory priorities conferred to certain unsecured and unsubordinated preferred liabilities in the event of Resolution Measures imposed on the Issuer or in the event of the dissolution, liquidation, Insolvency, composition or other proceedings for the avoidance of Insolvency of, or against, the Issuer.

Ranking of the securities

The ranking of the Issuer's liabilities in insolvency or in the event of the imposition of Resolution Measures, such as a bail-in, is determined by German law. The Securities are unsecured unsubordinated preferred liabilities that would rank higher than the Issuer's regulatory capital, its subordinated liabilities and its unsecured unsubordinated non-preferred liabilities. The liabilities under the Securities rank *pari passu* with other unsecured unsubordinated preferred liabilities of the Issuer, including but not limited to derivatives, structured products and deposits not subject to protection. The liabilities under the Securities rank below liabilities protected in Insolvency or excluded from Resolution Measures, such as certain protected deposits.

Rights attached to the securities

The Securities provide holders of the Securities, on redemption or upon exercise, subject to a total loss, with a claim for payment of a cash amount. The Securities may also provide holders with an entitlement for the payment of a coupon.

The Coupon Certificate with Coupon Observation Dates and European Barrier Observation is linked to the performance of the Underlying. The way the Coupon Certificate with Coupon Observation Dates with European Barrier Observation works results from three key features:

1. Coupon payments

Coupon Payment is conditional. In the case of a conditional Coupon Payment, if the coupon condition does not occur on a Coupon Observation Date, a missed Coupon Payment will be made at a later Coupon Payment Date, provided that the coupon condition does occur on the respective Coupon Observation Date.

If Coupon Payment is conditional and

- a) if the Underlying closes equal to or above the Coupon Threshold, investors will receive the Coupon Amount (Coupon Payment) at the next Coupon Payment Date.
- b) if the Underlying does not close equal to or above the Coupon Threshold, no Coupon Payment will be made at the next Coupon Payment Date. If specified in the Final Terms, the Coupon Payment will be made at a later Coupon Payment Date, if the Underlying closes, as specified in the Final Terms, equal to or above the Coupon Threshold. If the Underlying does not close equal to or above the Coupon Threshold on any of the subsequent Coupon Observation Dates, no Coupon Payments will be made under the Coupon Certificate with Coupon Observation Dates with European Barrier Observation.

2. Early redemption

If the Underlying closes equal to or above the relevant Redemption Threshold on one of the Observation Dates, the Coupon Certificate with Coupon Observation Dates and European Barrier Observation will be redeemed early at the Specified Reference Level. Coupon Payments due or, if the Final Terms specify conditional Coupon Payments, any Coupon Payments, will be made additionally should the coupon conditions occur.

WKN/ISIN: DB2E0A / XS0460020752

3. Redemption at maturity

If there is no early redemption, investors will receive a Cash Amount on the Settlement Date which is determined depending on the performance of the Underlying as follows:

- c) If the Final Reference Level is equal to or above the Barrier, investors will receive a Cash Amount in the amount of the Specified Reference Level on the Settlement Date.
- d) If the Final Reference Level is below the Barrier, the Coupon Certificate with Coupon Observation Dates and European Barrier Observation will participate 1:1 in the negative performance of the Underlying based on the Initial Reference Level.

If the Final Terms specify this, Coupon Payments due or, if the Final Terms specify conditional Coupon Payments, any Coupon Payments, will be made additionally should the coupon conditions occur.

Investors limit their return to the Specified Reference Level and Coupon Payments in return for the possibility of early redemption.

Investors also have no claims to the/deriving from the Underlying.

and Conditions.
Where will the securities be traded?
Application will be made to admit to trading the Securities on the multilateral trading facility (MTF) EuroTLX of EuroTLX SIM S.p.A., which is not a regulated market for the purposes of Directive 2014/65/EU (as amended).
What are the key risks that are specific to the securities?
<p>Risks at Maturity</p> <p>If the Final Reference Level is below the Barrier, the Coupon Certificate with Coupon Observation Dates and European Barrier Observation involves a risk of loss depending on the price or level of the Underlying. The lower the price or level of the Underlying at maturity, the greater the loss. In the worst-case scenario, this may result in the total loss of the capital invested. This will occur if the Final Reference Level is zero.</p> <p>Risks associated with Market Disruptions</p> <p>Subject to certain conditions being met, the Calculation Agent may determine that a Market Disruption has occurred. This means that the price or level of the Underlying cannot be determined, at least temporarily. Market Disruptions may occur on an exchange relevant for the Underlying, particularly in the event of trade interruptions. This may have an effect on the timing of valuation and may delay payments on or the settlement of the Securities.</p> <p>Risks associated with Adjustment and Termination Events</p> <p>Subject to certain conditions being met, the Issuer may replace Underlyings, adjust the Final Terms or terminate the Securities. In case of a termination, the Issuer will pay, usually prior to the scheduled settlement date of the Securities, an amount determined by the Calculation Agent. Such amount may be significantly less than an investor's initial investment in Securities and in certain circumstances may be zero.</p> <p>Any adjustment or termination of the Securities or replacement of an Underlying may lead to a loss in value of the Securities or may at maturity lead to the realisation of losses or even to the total loss of the invested amount. It is also not excluded that an adjustment measure will later prove to be incorrect or to be disadvantageous for Securityholders. A Securityholder could also be put in an economically worse position by the adjustment measure than before such adjustment measure.</p> <p>Risks associated with Underlying</p> <p>Market risk is the most significant cross-product risk factor in connection with Underlyings of all kinds. An investment in Securities linked to any Underlying may bear similar market risks to a direct investment in the relevant share.</p> <p>The performance of Securities depends on the performance of the price or level of the Underlying and therefore on the value of the embedded option. This value may be subject to major fluctuations during the term. The higher the volatility of the Underlying is, the greater the expected intensity of such fluctuations is. Changes in the price or level of the Underlying will affect the value of the Securities, but it is impossible to predict whether the price or level of the Underlying will rise or fall.</p> <p>Securityholders thus bear the risk of unfavourable performance of the Underlying, which may lead to loss in value of the Securities or a reduction of the cash amount, up to and including total loss.</p> <p>Exchange rate / currency risks</p> <p>An investment in the Securities involves exchange rate and/or currency risks, if the Settlement Currency of the Securities is different from the currency of a Securityholder's home jurisdiction. Furthermore, the Securities also lead to an exchange rate and currency risk, because the price or level of the Underlying is determined in a currency other than the Settlement Currency (the so-called Reference Currency). In addition to the risk of an adverse development of the Underlying there is the risk of a loss in value of the relevant rate of exchange which can, respectively, offset any favourable development of the Underlying.</p> <p>The Securities may be Illiquid</p> <p>It is not possible to predict if and to what extent a secondary market may develop in the Securities or at what price the Securities will trade in the secondary market or whether such market will be liquid. Insofar and as long as the Securities are listed or quoted or admitted to trading on a stock exchange, no assurance is given that any such listing or quotation or admission to trading will be maintained. Higher liquidity does not necessarily result from a listing, quotation or admission to trading.</p> <p>If the Securities are not listed or quoted or admitted to trading on any stock exchange or quotation system, pricing information for the Securities may be more difficult to obtain and the liquidity of the Securities may be adversely affected. The liquidity of the Securities may also be affected by restrictions on offers and sales of the Securities in some jurisdictions.</p> <p>Even where an investor is able to realise its investment in the Securities by selling this may be at a substantially lower value than its original investment in the Securities. Depending on the structure of the Securities, the realisation value at any time may be zero (0), which means a total loss of the capital invested. In addition, a transaction fee may be payable in respect of a sale of the Securities.</p> <p>Regulatory Bail-in and other Resolution Measures</p> <p>Laws enable the competent resolution authority to also take measures in respect of the Securities. These measures may have an adverse effect on the Securityholders.</p> <p>If the legal requirements are met in respect of the Issuer, BaFin as the resolution authority, may, in addition to other measures, write down Securityholders' claims from the Securities in part or in full or convert them into equity (shares) of the Issuer ("Resolution Measures"). Other Resolution Measures available include (but are not limited to) transferring the Securities to another entity, varying the terms and conditions of the Securities (including, but without limitation to, varying the maturity of the Securities) or cancelling the Securities. The competent resolution authority may apply Resolution Measures individually or in any combination.</p>

If the resolution authority takes Resolution Measures, Securityholders bear the risk of losing their claims from the Securities. In particular, this includes their claims for payment of the cash amount or redemption amount or for delivery of the delivery item.
