Issue-specific summary

These Final Terms have been prepared for the purposes of Article 8(5) of the Prospectus Regulation and must be read in conjunction with the Base Prospectus, comprising the Securities Note dated 1 September 2023 and any further supplements (the "Securities Note") and the Registration Document dated 4 May 2023 as supplemented (the "Registration Document"), in order to obtain all relevant information. Full information on the Issuer and the Securities is only available on the basis of the combination of these Final Terms, the Securities Note and the Registration Document.

The Securities Note dated 1 September 2023, the Registration Document dated 4 May 2023, any supplements to the Base Prospectus or the Registration Document, and the

WKN/ISIN: DB2RVD/ XS0461553942

Final Terms are published, in accordance with Article 21(2)(a) of the Prospectus Regulation, in electronic form on the Issuer's website (www.xmarkets.db.com).

In addition, the Securities Note dated 1 September 2023 , and the Registration Document dated 4 May 2023 and any supplements to the Base Prospectus or the Registration Document shall be available free of charge at the registered office of the Issuer, Deutsche Bank AG, Mainzer Landstrasse 11-17, 60329 Frankfurt am Main, and its Milan branch, Via Filippo Turati 27, 20121 Milan, Italy.

A summary of the individual issuance is annexed to the Final Terms.

Terms not otherwise defined herein shall have the meaning given in the General Conditions of the Securities set out in the Terms and Conditions.

Economic terms of the Securities

The following description of the Security explains the economic terms of the Security and its characteristics.

Product No. 106: Drop Back Certificate

The Drop Back Certificate enables investors to participate in the performance of the Underlying. The way this Certificate works results from the following features:

1) Allocation components

The Drop Back Certificate comprises two components: a Cash Component and an Investment Component. The Issue Price is initially invested up to a percentage into a fixed-rate component (the "**Cash Component**") and in a non-interest bearing component linked to the performance of the Underlying (the "**Investment Component**"). During the term of the Drop Back Certificate a reallocation of the two components takes place on a percentage basis (allocation), as soon as the Underlying falls below a Drop Back Threshold (a "**Drop Back Event**"). If a Drop Back Event occurs, a further percentage of the Issue Price which was initially invested in the Cash Component, will be reallocated and invested in the Investment Component. If the Final Terms provide for several Drop Back Thresholds, and during the term of the Drop Back Certificate all Drop Back Events in respect of these Drop Back Thresholds occur, the entire Issue Price will be invested into the Investment Component.

2) Coupon payments

The Drop Back Certificate is fixed-rate and pays a fixed coupon on the Coupon Payment Dates. The amount of these Coupon Payments is dependent on the occurrence of the Drop Back Event(s), which lead(s) to a reduction and reallocation of the Cash Component on a percentage basis into the Investment Component. This reallocated percentage will no longer yield any interest following the occurrence of the respective Drop Back Event.

3) Redemption at maturity

- a) If **no** Drop Back Event has occurred, investors receive on the Settlement Date the percentage of the Issue Price, which was initially invested into the Cash Component and participate in the performance of the Underlying with the remaining non-interest bearing Investment Component.
- b) If **at least one** Drop Back Event has occurred, investors receive on the Settlement Date the percentage of the Issue Price which is invested in the Cash Component at maturity plus an amount dependent on the Underlying.

This amount is calculated as follows: (A) The percentage of the Issue Price initially invested into the Investment Component multiplied by the quotient of (i) the Final Reference Level (as numerator) divided by (ii) the Initial Reference Level (as denominator), plus (B) the sum of each additional on occurrence of a Drop Back Event reallocated and in the Investment Component invested percentage of the Issue Price multiplied by the quotient of (i) the Final Reference Level (as numerator) divided by (ii) the relevant Barrier Determination Amount (as denominator).

- c) If the Final Terms provide for several Drop Back Thresholds, and all Drop Back Events in respect of these Drop Back Thresholds have occurred, investors participate solely in the performance of the Underlying at maturity.

Additionally, investors receive any due Coupon Payments.

A Drop Back Event can occur at any time during the trading hours of the Underlying; even outside of the trading hours of the Drop Back Certificate.

Investors also have no claims to the/deriving from the Underlying.

Terms and Conditions

The following "**Specific Terms of the Securities**" relating to the Securities shall, for the relevant Series of Securities, complete and put in concrete terms the General Conditions of the Securities for the purposes of such Series of Securities. The Specific Terms of the Securities and the General Conditions of the Securities together constitute the "**Terms and Conditions**" of the relevant Securities.

Product No. 106: Drop Back Certificate

Cash Amount An amount (which will not be less than zero) equal to the sum of:

- (a) the Final Cash Component,
- (b) the product of
 - (i) the Initial Investment Component and
 - (ii) the quotient of (x) the Final Reference Level (as numerator) and (y) the Initial Reference Level (as denominator), and
- (c) the sum of all Subsequent Investments.

As a formula:

$$\text{Final Cash Component} + \left(\text{Initial Investment Component} \times \frac{\text{Final Reference Level}}{\text{Initial Reference Level}} \right) + \sum \text{Subsequent Investments}_{(n)}$$

Where:

Subsequent Investment_(n) = is the Subsequent Investment in respect of the relevant Drop Back Event.

Subsequent Investment If a Drop Back Event has occurred in respect of a Drop Back Threshold on an Observation Date, the Subsequent Investment in respect of this Drop Back Event is an amount equal to:

the product of

- (a) the Subsequent Investment Component for this Drop Back Event and
- (b) the quotient of (x) the Final Reference Level (as numerator) and (y) the Barrier Determination Amount on this Observation Date (as denominator).

As a formula:

$$\text{Subsequent Investment Component}_{(n)} \times \frac{\text{Final Reference Level}}{\text{Barrier Determination Amount}_{(n)}}$$

WKN/ISIN: DB2RVD/ XS0461553942

Where:

Subsequent Investment Component_(n) = is the Subsequent Investment Component for the respective Drop Back Event.

Barrier Determination Amount_(n) = is the Barrier Determination Amount on the Observation Date, on which the respective Drop Back Event has occurred.

For the avoidance of doubt: If no Drop Back Event has occurred in respect of a Drop Back Threshold, the Subsequent Investment in respect of this Drop Back Threshold and this Drop Back Event is zero.

Drop Back Event Occurs in respect of an Observation Date and a Drop Back Threshold, if the Barrier Determination Amount falls below that Drop Back Threshold **for the first time** during the Observation Period on this Observation Date, irrespective of the occurrence of any Drop Back Event in respect of any other Drop Back Threshold on the same Observation Date or thereafter.

A Drop Back Event can occur only once in respect of a Drop Back Threshold.

For the avoidance of doubt: The simultaneous occurrence of Drop Back Events in respect of several Drop Back Thresholds on an Observation Date is possible, if the Barrier Determination Amount falls below several or all Drop Back Thresholds for the first time during the Observation Period on this Observation Date.

Drop Back Threshold 95 percent of the Initial Reference Level ("**Drop Back Threshold(1)**")

90 percent of the Initial Reference Level ("**Drop Back Threshold(2)**")

85 percent of the Initial Reference Level ("**Drop Back Threshold(3)**")

80 percent of the Initial Reference Level ("**Drop Back Threshold(4)**")

Initial Cash Component 80 percent of the Issue Price

Initial Investment Component 20 percent of the Issue Price

Subsequent Investment Component 20 percent of the Issue Price

Final Cash Component Corresponds to the Coupon Factor on the Valuation Date.

Coupon

Coupon Amount a) In respect of the first Coupon Payment Date, the sum of all outstanding Daily Coupon Amounts to (but excluding) the first Coupon Period End Date.

b) In respect of any subsequent Coupon Payment Date, the difference between:

- i. the sum of all outstanding Daily Coupon Amounts to (but excluding) a Coupon Period End Date, and
- ii. the sum of all outstanding Daily Coupon Amounts to (but excluding) the end of the preceding Coupon Period End Date.

If any Coupon Amount will be payable on the Coupon Payment Date falling on the Settlement Date, such Coupon Amount will be payable together with, if applicable, any Cash Amount payable on the Settlement Date.

Daily Coupon Amount

In respect of any day during the Observation Period, an amount equal to the product of:

- a) the quotient of the Coupon (as numerator) and 360 (as denominator) and
- b) the Coupon Factor.

Coupon Factor

In respect of any day during the Observation Period, an amount equal to:

- a) the Initial Cash Component, as long as no Drop Back Event has occurred, and
- b) as soon as a Drop Back Event has occurred, the difference between:
 - i. the Initial Cash Component and
 - ii. the sum of the Subsequent Investment Components in respect of the Drop Back Events that have occurred on and before this day.

For the avoidance of doubt: The Coupon Factor can amount to zero in respect of a day, in case a Drop Back Event has occurred in respect of all Drop Back Thresholds on and before this day.

Coupon Period

The period commencing on (and including) the Initial Valuation Date to (but excluding) the first Coupon Period End Date and each period commencing on (and including) a Coupon Period End Date to (but excluding) the next following Coupon Period End Date.

Determination of the price by the Issuer

Both the Initial Issue Price of the *Drop Back Certificate* and the bid and ask prices quoted by the Issuer during its term are based on the Issuer's internal pricing models. Accordingly, unlike in an on exchange trading, for example for shares, the prices quoted during the term are not based on supply and demand. The prices in particular contain a margin which the Issuer determines at its free discretion and which may cover, in addition to the Issuer's proceeds, the costs of structuring, market making and settlement of the *Drop Back Certificate*, any applicable sales costs (distribution fee) and other costs.

Distribution fee

Placement fee: up to 2.50 per cent of the Issue Price. The Issuer will either pay the placement fee from the issue proceeds as a one-off turnover-related distribution fee to the bank that sold the *Drop Back Certificate* to the customer (principal bank), or grant the latter a corresponding discount from the Initial Issue Price.

What are the key risks that are specific to the issuer?

The Issuer is subject to the following key risks:

Macroeconomic, Geopolitical and Market Environment: As a global corporate and investment bank with a large private client franchise, Deutsche Bank is materially affected by global macroeconomic and financial market conditions. Significant challenges may arise from persistent inflation and rising interest rates, the continuing war in Ukraine, supply chain disruptions, a deteriorating macroeconomic environment and elevated geopolitical risks, the ongoing headwinds posed by regulatory reforms and/or the effects on Deutsche Bank's legal and regulatory proceedings. Other risks exist with respect to China and from political and economic instability in key markets. These risks could negatively affect the business environment, leading to weaker economic activity and a broader correction in the financial markets. Materialization of these risks could negatively affect the results of operations in some of Deutsche Bank's businesses and its financial condition as well as its strategic plans. Deutsche Bank's ability to protect itself against these risks is limited.

Business and Strategy: Deutsche Bank's results of operation and financial condition have in the past been negatively impacted by the market environment, uncertain macroeconomic and geopolitical conditions, lower levels of client activity, increased competition and regulation, along with tightening labor market conditions. If Deutsche Bank is unable to sustain its improved profitability resulting from its transformation, it may be unable to meet its 2025 targets, and may have difficulty maintaining capital, liquidity and leverage at levels expected by market participants and its regulators.

Regulation and Supervision: Regulatory reforms enacted and proposed in response to weaknesses in the financial sector and, more recently, to the envisaged transition towards a sustainable economy, together with increased regulatory scrutiny more generally, have had and continue to have a significant impact on Deutsche Bank and may adversely affect its business and ability to execute its strategic plans. Competent regulators may prohibit Deutsche Bank from making dividend payments, share repurchases or payments on its regulatory capital instruments or take other actions if the Group fails to comply with regulatory requirements.

Internal Control Environment: A robust and effective internal control environment and adequate infrastructure (comprising people, policies and procedures, controls testing and IT systems) are necessary to ensure that Deutsche Bank conducts its business in compliance with the laws, regulations and associated supervisory expectations applicable to Deutsche Bank. Deutsche Bank has identified the need to strengthen its internal control environment and infrastructure and has embarked on initiatives to accomplish this. If these initiatives are not successful or proceed too slowly, Deutsche Bank's reputation, regulatory position and financial condition may be materially adversely affected, and its ability to achieve Deutsche Bank's strategic ambitions may be impaired.

Litigation, Regulatory Enforcement Matters, Investigations and Tax Examinations: Deutsche Bank operates in a highly and increasingly regulated and litigious environment, potentially exposing the bank to liability and other costs, the amounts of which may be substantial and difficult to estimate, as well as to legal and regulatory sanctions and reputational harm.

Environmental, Social and Governance (ESG)-Related Changes: The impacts of rising global temperatures, and the enhanced focus on climate change and the transition to a "net-zero" economy from society, the regulators and the banking sector, have led to new sources of financial and non-financial risks. These include the physical risks arising from extreme weather events which are growing in frequency and severity, as well as transition risks as carbon-intensive sectors are faced with higher taxation, reduced demand and potentially restricted access to financing, and risks relating to the portrayal of ESG aspects of activities. These risks can impact Deutsche Bank across a broad range of financial and non-financial risk types.

Section C – Key information on the securities

What are the main features of the securities?

Type of securities

The Securities are *Certificates*.

Class of securities

The Securities will be represented by a global security (the "**Global Security**"). No definitive Securities will be issued. The Securities will be issued in bearer form.

Securities identification number(s) of the securities

ISIN: XS0461553942 / WKN: DB2RVD

Applicable law of the securities

The Securities will be governed by German law. The constituting of the Securities may be governed by the laws of the jurisdiction of the Clearing Agent.

Restrictions on the free transferability of the securities

Each Security is transferable in accordance with applicable law and any rules and procedures for the time being of any Clearing Agent through whose books such Security is transferred.

Status of the securities

The Securities constitute unsecured and unsubordinated preferred liabilities of the Issuer ranking *pari passu* among themselves and *pari passu* with all other unsecured and unsubordinated preferred liabilities of the Issuer, subject, however, to statutory priorities conferred to certain unsecured and unsubordinated preferred liabilities in the event of Resolution Measures imposed on the Issuer or in the event of the dissolution, liquidation, Insolvency, composition or other proceedings for the avoidance of Insolvency of, or against, the Issuer.

Ranking of the securities

The ranking of the Issuer's liabilities in insolvency or in the event of the imposition of Resolution Measures, such as a bail-in, is determined by German law. The Securities are unsecured unsubordinated preferred liabilities that would rank higher than the Issuer's regulatory capital, its subordinated liabilities and its unsecured unsubordinated non-preferred liabilities. The liabilities under the Securities rank *pari passu* with other unsecured unsubordinated preferred liabilities of the Issuer, including but not limited to derivatives, structured products and deposits not subject to protection. The liabilities under the Securities rank below liabilities protected in Insolvency or excluded from Resolution Measures, such as certain protected deposits.

Rights attached to the securities

The Securities provide holders of the Securities, on redemption or upon exercise, subject to a total loss, with a claim for payment of a cash amount. The Securities may also provide holders with an entitlement for the payment of a coupon.

The Drop Back Certificate enables investors to participate in the performance of the Underlying. The way this Certificate works results from the following features:

1) *Allocation components*

The Drop Back Certificate comprises two components: a Cash Component and an Investment Component. The Issue Price is initially invested up to a percentage into a fixed-rate component (the "**Cash Component**") and in a non-interest bearing component linked to the performance of the Underlying (the "**Investment Component**"). During the term of the Drop Back Certificate a reallocation of the two components takes place on a percentage basis (allocation), as soon as the Underlying falls below a Drop Back Threshold (a "**Drop Back Event**"). If a Drop Back Event occurs, a further percentage of the Issue Price which was initially invested in the Cash Component, will be reallocated and invested in the Investment Component. If the Final Terms provide for several Drop Back Thresholds, and during the term of the Drop Back Certificate all Drop Back Events in respect of these Drop Back Thresholds occur, the entire Issue Price will be invested into the Investment Component.

2) *Coupon payments*

The Drop Back Certificate is fixed-rate and pays a fixed coupon on the Coupon Payment Dates. The amount of these Coupon Payments is dependent on the occurrence of the Drop Back Event(s), which lead(s) to a reduction and reallocation of the Cash Component on a percentage basis into the Investment Component. This reallocated percentage will no longer yield any interest following the occurrence of the respective Drop Back Event.

3) *Redemption at maturity*

- a) If **no** Drop Back Event has occurred, investors receive on the Settlement Date the percentage of the Issue Price, which was initially invested into the Cash Component and participate in the performance of the Underlying with the remaining non-interest bearing Investment Component.

- b) If **at least one** Drop Back Event has occurred, investors receive on the Settlement Date the percentage of the Issue Price which is invested in the Cash Component at maturity plus an amount dependent on the Underlying.

This amount is calculated as follows: (A) The percentage of the Issue Price initially invested into the Investment Component multiplied by the quotient of (i) the Final Reference Level (as numerator) divided by (ii) the Initial Reference Level (as denominator), plus (B) the sum of each additional on occurrence of a Drop Back Event reallocated and in the Investment Component invested percentage of the Issue Price multiplied by the quotient of (i) the Final Reference Level (as numerator) divided by (ii) the relevant Barrier Determination Amount (as denominator).

- c) If the Final Terms provide for several Drop Back Thresholds, and all Drop Back Events in respect of these Drop Back Thresholds have occurred, investors participate solely in the performance of the Underlying at maturity.

Additionally, investors receive any due Coupon Payments.

A Drop Back Event can occur at any time during the trading hours of the Underlying; even outside of the trading hours of the Drop Back Certificate.

Investors also have no claims to the/deriving from the Underlying.

Security Type	Certificate / Drop Back Certificate

Limitations to the rights attached to the Securities

Under the conditions set out in the Terms and Conditions, the Issuer is entitled to terminate the Securities and to amend the Terms and Conditions.

Where will the securities be traded?

Application will be made to admit to trading the Securities on the multilateral trading facility (MTF) EuroTLX of EuroTLX SIM S.p.A., which is not a regulated market for the purposes of Directive 2014/65/EU (as amended).

What are the key risks that are specific to the securities?

Risks at Maturity

a) If no Drop Back Event has occurred, the Drop Back Certificate involves a risk of loss if the Cash Amount plus Coupon Payments is lower than the purchase price of this product. In such a case, investors will suffer a loss, the amount of which will be greater, the lower the price or level of the Underlying is at maturity.

b) If at least one Drop Back Event has occurred, the Drop Back Certificate involves a risk of loss if the Cash Amount plus Coupon Payments is lower than the purchase price of this product. In such a case, investors will suffer a loss, the amount of which will be greater, the lower the price or level of the Underlying is at maturity.

c) If the Final Terms provide for several Drop Back Thresholds, and all Drop Back Events in respect of these Drop Back Thresholds have occurred, the Drop Back Certificate involves a risk of loss depending on the price or level of the Underlying. The lower the price or level of the Underlying is at maturity, the greater the loss. In the worst-case scenario, this may result in the total loss of the capital invested. This will occur if the Final Reference Level is zero.

Risks associated with Market Disruptions

Subject to certain conditions being met, the Calculation Agent may determine that a Market Disruption has occurred. This means that

the price or level of the Underlying cannot be determined, at least temporarily. Market Disruptions may occur on an exchange relevant for the Underlying, particularly in the event of trade interruptions. This may have an effect on the timing of valuation and may delay payments on or the settlement of the Securities.

Risks associated with Adjustment and Termination Events

Subject to certain conditions being met, the Issuer may replace Underlyings, adjust the Final Terms or terminate the Securities. In case of a termination, the Issuer will pay, usually prior to the scheduled settlement date of the Securities, an amount determined by the Calculation Agent. Such amount may be significantly less than an investor's initial investment in Securities and in certain circumstances may be zero.

Any adjustment or termination of the Securities or replacement of an Underlying may lead to a loss in value of the Securities or may at maturity lead to the realisation of losses or even to the total loss of the invested amount. It is also not excluded that an adjustment measure will later prove to be incorrect or to be disadvantageous for Securityholders. A Securityholder could also be put in an economically worse position by the adjustment measure than before such adjustment measure.

Risks associated with Underlying

Market risk is the most significant cross-product risk factor in connection with Underlyings of all kinds. An investment in Securities linked to any Underlying may bear similar market risks to a direct investment in the relevant index.

The performance of Securities depends on the performance of the price or level of the Underlying and therefore on the value of the embedded option. This value may be subject to major fluctuations during the term. The higher the volatility of the Underlying is, the greater the expected intensity of such fluctuations is. Changes in the price or level of the Underlying will affect the value of the Securities, but it is impossible to predict whether the price or level of the Underlying will rise or fall.

Securityholders thus bear the risk of unfavourable performance of the Underlying, which may lead to loss in value of the Securities or a reduction of the cash amount, up to and including total loss.

Exchange rate / currency risks

An investment in the Securities involves exchange rate and/or currency risks if the Settlement Currency of the Securities is different from the currency of a Securityholder's home jurisdiction. In addition to the risk of an adverse development of the Underlying there is the risk of a loss in value of the relevant rate of exchange which can, respectively, offset any favourable development of the Underlying.

The Securities may be Illiquid

It is not possible to predict if and to what extent a secondary market may develop in the Securities or at what price the Securities will trade in the secondary market or whether such market will be liquid. Insofar and as long as the Securities are listed or quoted or admitted to trading on a stock exchange, no assurance is given that any such listing or quotation or admission to trading will be maintained. Higher liquidity does not necessarily result from a listing, quotation or admission to trading.

If the Securities are not listed or quoted or admitted to trading on any stock exchange or quotation system, pricing information for the Securities may be more difficult to obtain and the liquidity of the Securities may be adversely affected. The liquidity of the Securities may also be affected by restrictions on offers and sales of the Securities in some jurisdictions.

Even where an investor is able to realise its investment in the Securities by selling this may be at a substantially lower value than its original investment in the Securities. Depending on the structure of the Securities, the realisation value at any time may be zero (0), which means a total loss of the capital invested. In addition, a transaction fee may be payable in respect of a sale of the Securities.

Regulatory Bail-in and other Resolution Measures

Laws enable the competent resolution authority to also take measures in respect of the Securities. These measures may have an adverse effect on the Securityholders.

If the legal requirements are met in respect of the Issuer, Bafin as the resolution authority, may, in addition to other measures, write down Securityholders' claims from the Securities in part or in full or convert them into equity (shares) of the Issuer ("**Resolution Measures**"). Other Resolution Measures available include (but are not limited to) transferring the Securities to another entity, varying the terms and conditions of the Securities (including, but without limitation to, varying the maturity of the Securities) or cancelling the Securities. The competent resolution authority may apply Resolution Measures individually or in any combination.

If the resolution authority takes Resolution Measures, Securityholders bear the risk of losing their claims from the Securities. In particular, this includes their claims for payment of the cash amount or redemption amount or for delivery of the delivery item.
